This is MTN Nigeria Communications Plc’s 2024 Sustainability Report, marking our sixth consecutive year of transparent sustainability reporting. This report serves as a complementary disclosure to our 2024 Annual Report, offering our stakeholders a deeper understanding of our sustainability initiatives, impact, and progress towards our long-term goals.

This report outlines our sustainability progress for the period January 1 2024 to December 31 2024 and is structured around our Sustainability Focus Areas, which are aligned with the MTN Group’s Sustainability Strategy and Commitments. In preparing this report, we have integrated key global and local sustainability

reporting frameworks, ensuring transparency and accountability. These include the International Financial Reporting Standards (IFRS) Sustainability Disclosure Standards (IFRS S1 and IFRS S2); applicable Sustainability Accounting Standards Board (SASB) standards; Global Reporting Initiative (GRI) Standards; United Nations Global Compact (UNGC) Principles, the Nigerian Stock Exchange (NGX) Sustainability Disclosure Guidelines; the Securities and Exchange Commission (SEC) Sustainable Financial Principles for the Nigerian Capital Market; and the Nigerian Code of Corporate Governance (NCCG) issued by the Financial Reporting Council of Nigeria (FRC). Additionally, this

report highlights MTN Nigeria’s contributions to the United Nations Sustainable Development Goals (UNSDGs) and the steps we are taking to contribute to their efforts. This is our second consecutive sustainability report, marking our ongoing commitment as early adopters of the IFRS Sustainability Disclosure Standards.

The report is built on data gathered from across our organisation using our in-house ESG Data Management Collection Tool, which we have maintained from last year’s reporting. We deployed similar methods for data curation including spreadsheets for data input, email approvals for verification and validation, and reference from other publications, such as our 2024 Annual Report. Additional data was obtained from stakeholder engagements, surveys, research reports, benchmarking, and results from periodic assessments of our sustainability performance undertaken by external organisations.

While our 2024 Sustainability Report has undergone robust internal review to ensure the accuracy, completeness, and consistency of its disclosures, it has not

“This is our second consecutive sustainability report, marking our ongoing commitment as early adopters of the IFRS Sustainability Disclosure Standards.”

yet received independent third-party assurance. We recognise the importance of external validation and we are actively monitoring the International Standard on Sustainability Assurance 5000 (ISSA 5000), issued by the IAASB in November 2024, which establishes a global benchmark for sustainability assurance engagements. Moving forward, we are committed to engaging qualified assurance providers to apply ISSA 5000 principles, reinforcing our commitment to external validation, transparency, and stakeholder confidence in future reports.

We value your feedback and encourage you to share your thoughts, comments, or inquiries regarding this report. Your insight helps us improve sustainability initiatives and reporting.

Message from Leadership

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

We are pleased to present our 2024 Sustainability Report, which details our comprehensive efforts to create positive, lasting impact in the communities we serve and for the people whose lives we touch.

Over the past years, the business world has increasingly focused on sustainable development - emphasising climate change, the circular economy, digital rights, and community engagement. At MTN Nigeria, sustainability is woven into the fabric of our corporate philosophy. We believe that everyone should have access to the benefits of a modern connected life, transforming resources into positive outcomes and creating shared value for all our stakeholders.

From day one, we have viewed **Doing for Tomorrow, Today** as core to how we do business. This approach integrates ESG practices into all aspects of our operations. By equipping our employees with the necessary tools and knowledge, we advance our sustainability goals while ensuring that strong governance and sustainable social and environmental practices enhance value, reduce risks, and secure our long-term viability.

In 2024, we invested N3.5 billion in Corporate Social Investment, bringing our total investment to N31.9 billion since inception. Our efforts have made a tangible impact, benefitting over 663,300 individuals, supporting 628 small businesses, and improving educational outcomes in 62 schools across Nigeria.

Additionally, we advanced our Project GreenCycle initiative to promote waste management and water conservation.

Our governance efforts have been equally notable. We became the first Nigerian company and the first within

**“From day one, we have viewed
Doing For Tomorrow, Today
as core to how we do business.”**

We launched the Sustainability in Action, Value for Everyone (SAVE) campaign to boost employee awareness and engagement in sustainability initiatives. We also enhanced the global accessibility of our 2023 sustainability report by digitally tagging it with the eXtensible Business Reporting Language (XBRL), for easy access by investors, rating agencies, and other stakeholders.

In 2024, we reduced our Scope 1 and 2 emissions by 11.0%, lowering emissions from 113,826 tCO₂e (our 2021 baseline) to 101,300 tCO₂e - a 2.6% increase from the previous year. We also expanded our renewable energy adoption by adding 194 solar-powered rural telephony sites and became the first telecommunications organisation in West Africa to launch eco-friendly SIM cards, reinforcing our commitment to reducing our carbon

the MTN Group to receive the Compliance Management System (CMS) certification from the International Accreditation Service (IAS).

Inclusion remains a priority, as evidenced by the increased female representation in our workforce, which rose to 41.4% from 38.7% in 2023, and by our expanded broadband coverage, which increased to 90.1% from 89.8% in 2023, deepening digital inclusion in Nigeria.

We also contributed over N764.2 billion in taxes, levies, and duties to the Nigerian government, and our commitment to transparency is reflected in our improved sustainability performance metrics, including a Carbon Disclosure Project (CDP) rating of 'B-' for Climate Change, a 'C' for Water Security, a Risk Insights ESG GPS

Introduction

sustainability rating of 3.6/4.0 (up from 3.4/4.0 in 2023), and a reputation index score of 79%, exceeding our benchmark of 75%. Additionally, we became early adopters of the International Financial Reporting Sustainability Disclosure Standards (IFRS S1 and S2), ahead of the mandatory date set by the Financial Reporting Council of Nigeria.

Our Sustainability Context

Our efforts have been recognised on several platforms, including the Best Achievement in Sustainability Management Award for 2024, presented at the 2025 MTN Global Leadership Gathering. These recognitions highlight our commitment to driving sustainable improvement and profitability. We continue to empower our teams to integrate ESG principles into daily decision-making, ensuring that our actions deliver both immediate and long-term value. We thank our employees, partners, and stakeholders for their ongoing commitment to transforming resources into net-positive outcomes for all.

MTN Nigeria is a leading force in Nigeria’s telecommunications industry. We are committed to delivering innovative digital solutions that drive progress and connectivity across Africa. As a subsidiary of the MTN Group - a significant player in the telecommunications sector across Africa and the Middle East - we are part of a network that spans across 16 countries.

We serve over 80 million customers, connecting individuals, businesses, and communities to local and global opportunities. Since opening our doors in 2001, we have led the charge in digital innovation, expanded access to technology, and promoted inclusion and economic advancement.

Guided by our Ambition 2025 strategy, **"Leading digital solutions for Africa's progress"**, we continually expand our impact. As Africa's largest fixed and mobile network operator with a vast customer base and an extensive distribution network, we deliver telecommunications solutions that empower individuals and businesses.

Ambition 2025: Leading digital solutions for Africa's progress

Build the largest and most valuable platforms

Drive industry leading connectivity operations

Create shared value

Accelerate portfolio transformation

Enabled by our values:

Lead with Care

Collaborate with Agility

Act with Inclusion

Can-do with Integrity

Serve with Respect

“Everyone deserves the benefits of a modern connected life.”

Material Matters In Focus

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

Our sustainability strategy is premised on a deep understanding of the material matters that shape our stakeholders' perceptions and expectations. We utilise a rigorous materiality assessment process to identify, prioritise, and address the critical ESG issues affecting our business. Our approach considers actual and potential economic, environmental, and social impact, and evaluate them based on their significance, severity, likelihood, scale, reach, and probability of occurrence.

Our material topics adhere to sector-specific GRI Standards and International Financial Reporting Standards (IFRS) S1 and S2 sustainability disclosure requirements. This ensures consistency with global reporting expectations, while enhancing transparency and accountability. Our highest governance body reviews and approves the final material topics, guaranteeing credibility and meaningful integration of stakeholder perspectives.

Our materiality matrix provides a clear visual representation of the prioritised issues that shape our sustainability strategy, guiding our efforts to create long-term value for our stakeholders.

RELEVANCE TO STAKEHOLDERS

RELEVANCE TO MTN NIGERIA

We continue to implement our SevenPillars© framework - Institutional, Operational, Financial, Environmental, Social, Cultural, and Economic - to fully integrate sustainability into all our operations. Guided by our Ambition 2025 strategy, our materiality process drives responsible decision-making, transparency, and meaningful impact.

As we progress, our materiality process remains a key tool in guiding responsible business decisions.

Collaborating With Our Stakeholders

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

Embracing sustainability requires aligning with stakeholder expectations, addressing their concerns, and integrating their insights into our decision-making processes. We recognise that effective stakeholder engagement is fundamental to driving sustainable growth and shared value. By proactively engaging with our stakeholders, we strengthen trust, transparency, and long-term partnerships, ensuring that their concerns, expectations, and aspirations are consolidated into our decision-making processes.

Our approach to stakeholder engagement aligns with global best practice, ensuring that our interactions with stakeholders remain strategic, inclusive, and impact-driven.

- Our stakeholder engagement process includes:
- Defining purpose, scope, and key focus areas.
 - Identifying and prioritising stakeholders based on influence, relevance, and strategic importance.
 - Establishing engagement channels and methods.
 - Assessing stakeholder concerns and expectations.
 - Integrating feedback into decision-making processes.
 - Monitoring engagement outcomes and improving practice.

Media

Why we engaged ▶

- To ensure effective reputation management, information dissemination, as well as stakeholder relationship.

**Quarterly Periodically**

Communication Medium

- Media engagements to discuss business matters
- Virtual meetings
- Emails
- Interviews
- Media parleys and press conferences

Our Responses

- We provide accurate, dependable, and timely information to keep our stakeholders and the general public informed about MTN Nigeria's progress.
- Over the years, we have maintained a mutually beneficial relationship with the media.

Issues Discussed

- Access to information

Our Results

- Multiple awards won on brand and reputation management.
- Continued the MTN Media Innovation Programme (MIP).

Customers

Why we engaged

- To deliver a personalised experience and collate feedback for improved customer experience that ultimately drives customer satisfaction across all our varied touchpoints.
- By interacting with customers, we can proactively identify potential issues for quick resolution in order to maintain improved excellent service delivery.

Periodically

Our Sustainability Context	Communication Medium	Issues Discussed	Our Responses	Our Results
Governance	• Traditional channels (Service and Call centres) • Radio programmes and TV advertisement/Campaigns • Newsletters • Digital channels (www.mtn.ng, Zigi Chatbot, myMTN NG App, MTN eShop, SMS, Interactive Voice Response -IVR) • Social media (Facebook, Instagram, X, Telegram) • Outbound telephone calls • Customer forums and panel study sessions	• Customer experience/service quality • Product information and enlightenment • Brand affinity and satisfaction matrix • Affordable communication services • Coverage and connectivity • Information security and data privacy • Data consumption	• Enhanced customer experience through automation and digitisation. • Streamlined Billing Process: Leveraging Robotic Process Automation (RPA), to simplify and augment our billing system, ensuring transparency and excellence in service delivery. • Digitised Platforms for Self-Service: As part of our digitisation agenda, we deployed intuitive digital platforms and commenced the transformation of our physical stores into digital stores, empowering customers to serve themselves at their convenience. • Real-Time Customer Support: Our optimised systems enable our social media team to respond promptly to customer queries across all digital channels, ensuring swift resolution of escalations. • Prioritising Customer Data Privacy: We uphold stringent ethical standards in managing customer data, prioritising privacy and security through measures like the biometric login on our myMTN NG App. • Commitment to Quality Service Delivery: Our dedication to delivering exceptional service is reflected in our sustained Net Promoter Score ranking, driven by key performance indicators. • Customer Education: We provided more insight on specific products and services based on customer queries on our channels.	• 80.9 million customers served. • Net Promoter Score - 1st • We maintained these ISO certifications in the reporting year (QMS: ISO9001, ISMS: ISO27001, BCM: ISO22301)

Employees

Why we engaged ▶

- To determine how our Employee Value Proposition delivers on our brand promise and strategic objectives.
- To drive employee productivity and engagement.
- To promote open communication, keeping employees informed about business performance and people initiatives, while also encouraging feedback and addressing employee questions.

Periodically
Bi-Monthly
Quarterly
Bi-annually
Annually

Communication Medium

- Emails
- Virtual and in-person meetings
- Internal communications
- Internal surveys
- Training and capacity building activities
- Team bonding sessions
- Strategy retreats

Issues Discussed

- Business and functional strategy development
- Roll-out of 5G Network
- Tariff rates
- Business performance updates
- Culture and change
- Medicals
- Performance and Talent Management
- Reward and recognition
- People Management Initiatives
- MoMo PSB

Our Responses

- Our Employee Value Proposition (EVP) enables our people to excel in their individual and collective areas of strength, enabling the activation of the best talent, culture and skills to achieve Ambition 2025.
- We invest in employee capacity development programmes and offer several self-development and career advancement platforms.
- Additionally, our performance management system is designed to drive reward and recognition.

Our Results

- 100% participation in Group Culture Audit (GCA)/Sentimeter Employee Survey in 2024.
- Employee sustainable engagement score of 92%.
- 93% average score by employees to the survey question “My company speaks to me! I am engaged on matters that impact us, including our strategy, performance and success.” (+3ppt improvement in comparison to 2023 outcome).
- Achieved an employee turnover rate of 5.7%, indicating improved employee retention.
- N85.2 billion in salaries, benefits, and other employee costs in 2024.

Trade Partners

Why we engaged ▶

- To gain insight into our trade partners’ business performance.
- To provide effective information dissemination.
- To effectively communicate targeted performance intervention programmes, sustainable business and capability development.

Quarterly
Monthly

Communication Medium

- Virtual and in-person meetings
- Emails
- WhatsApp

Issues Discussed

- Performance reviews
- Changes to commission structure
- Sales performance intervention programmes
- Cybersecurity and financial management training

Our Responses

- We have established a process of effective communication with our trade partners.
- This enables us to understand and address their expectations while ensuring that our commission payout is competitive.
- We provide the resources required for our trade partners to meet KYC requirements, which we monitor for compliance.

Our Results

- Provided additional credit facilities to partners to drive performance and manage costs.
- Incentivised partners for driving digital process adoption.
- Since inception, we have employed more than 2 million Nigerians, directly and indirectly, through trade partners and agents.

Investors and shareholders

Why we engaged ▶

- To provide updates on our operational and financial performance, business outlook, and strategy.
- To foster stronger relationships, build trust, and instill confidence among investors and shareholders on our investment case.
- To enhance transparency and credibility, gather investor feedback on key concerns or market expectations and provide insight to management.

Quarterly
Annually
Periodically

Communication Medium

- Investor Relations website
- NGX Issuer portal
- Emails
- Teleconference
- Roadshows
- Newspapers
- One-on-one meetings
- Annual General Meeting (AGM)

Issues Discussed

- Company operational and financial performance
- Business strategy, outlook and growth prospects
- Plans to restore the Company's retained earnings and equity position
- Operating environment, competitive landscape and impact on the business

Our Responses

- We provide regular update on business strategy and performance as well as corporate actions.
- We communicate our investment case and how we create value for all stakeholders.
- We hold investor road shows, AGM and quarterly teleconference to facilitate two-way communication with the investment community.
- Our dedicated investor relations email address serves as a channel through which we receive and respond to enquiries.

Our Results

- 36% increase in the Company's revenue in 2024.
- 4.3% increase in shareholders to 145,911.
- Fourth most capitalised listed company on the NGX.
- Average of 200 investors and analysts participated in the quarterly teleconference.
- Over 3,496 shareholders attended the AGM.

Suppliers

Why we engaged ▶

- To maintain supply chains that safeguard product and service availability against political or economic headwinds.

Quarterly
Annually
Periodically

Communication Medium

- Telephone and Email support
- Virtual and in-person meetings
- Supplier Forums

Issues Discussed

- Regulatory requirements
- Vendor transparency and timely payments
- Responsible sourcing practices
- Cost of doing business
- Local content principles
- Environmental sustainability
- IT Security

Our Responses

- We abide by all regulatory requirements and support our suppliers to do the same to foster integrity and ethical behaviour throughout our supply chain.
- We engage our suppliers regularly and provide support where necessary.
- We have implemented a systematic cost management initiative to ensure efficient operations, and our supply chain process supports local content.
- We encourage our suppliers to protect the ecosystem as they conduct business activities.
- We encourage our suppliers to ensure they protect their businesses from cyberthreats.

Our Results

- Over N1.4 trillion was spent on local procurement, over 47.5% year-on-year increase from 2023.
- More than 400 persons across 250 companies attended the 2024 Annual Suppliers' Forum.

Supported SDGs ▶

Government and Regulators

Why we engaged ▶

- To identify and proactively manage regulatory risks and positively influence policy changes.
- To improve the relationship with the Government at all levels and other key stakeholders.
- To build and maintain strategic regulatory and policy relationships.
- To maintain and improve on our compliance levels.
- To maintain our socio-political license to operate.
- To foster trust and transparency.
- To improve the proactiveness and maturity of regulatory engagements.
- To feel the pulse of stakeholders and mitigate.

- Various industry and regulatory engagements/meetings
- Periodic assessments/audits
- Public hearings

Issues Discussed

- State security
- Socio-economic development
- Digital human rights issues and National data sovereignty
- Data protection and customer satisfaction
- Environmental sustainability
- Health & safety and Community impact
- Labour standards and human rights
- Business ethics and Tax transparency
- Anti-corruption and bribery
- Leadership and corporate governance
- Climate change pollution & waste
- Regulatory and operational compliance
- Tax compliance and other support to meet fiscal targets
- Quality of service
- Spectrum acquisitions
- Impact of macroeconomic headwinds on business performance.
- Areas of collaboration to drive implementation of policy initiatives
- MTN Nigeria's industry contributions
- Right of Way permissions
- Technology Transfer
- Confirmation of Reasonableness
- Corporate Social Investment
- Critical National Infrastructure (CNI) and shareholder value protection
- Industry sustainability and tariff review

Our Responses

- We maintain zero-tolerance for non-compliance.
- We remain committed to strengthening investments in network coverage and capacity expansion for the delivery of optimal quality of service to customers.
- Cost reflective tariff adjustments and an appropriate pricing level to support the sustainability of the industry and pave the way for continuous investment.
- MTN Nigeria is committed to delivering leading digital solutions for Nigeria's progress.
- We enable state security by adhering to the subscriber KYC requirement.
- We assist security agencies with communication and logistics. This is in addition to our corporate social investment initiatives through our Foundation which supports the socio-economic development of Nigeria. We are conscious of our obligation to safeguard national data sovereignty and digital human rights, thus, we will continue to collaborate with our stakeholders in these areas.
- We ensure improved brand perception with key political leaders and government officials to significantly reduce political and government risks and increase MTN Nigeria's influence in government policy and strategic partnership with government MDAs.
- We ensure our commitment to improved quality of service to our customers is met.
- MTN commits to Zero Carbon emission by 2040, environmental sustainability and the fight against climate change.
- We reiterate our commitment to our corporate social responsibilities, tax compliance, corporate governance, anti-corruption, and leadership.
- We also urge for implementation of the CNI Implementation executive order.

Our Results

- Strategic partnerships with Government MDAs.
- Paid N764.2 billion in taxes, levies, and duties to the government.
- Zero regulatory fines and sanctions in 2024.

We asked our CCSSO...

Introduction

Our Sustainability
Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

How is MTN Nigeria engaging with local communities and stakeholders to ensure sustainability initiatives align with their needs and priorities? What mechanisms are in place for feedback and continuous improvement?

At MTN Nigeria, our commitment to sustainability extends beyond business operations—we actively invest in initiatives that drive positive change in society. Through the MTN Foundation, we support impactful programmes nationwide, and see to it that they align with real community needs. By engaging stakeholders, collaborating with community leaders, and partnering with NGOs, we foster inclusive and sustainable development.

A key initiative, “What Can We Do Together”, exemplifies our community-driven approach. This programme empowers Nigerians to identify and propose projects that address local needs, which the Foundation then brings to life. Since its launch in September 2015, this initiative has transformed lives and contributed to grassroots development across Nigeria.

To enhance our impact, we prioritise open dialogue and accountability. Stakeholder forums and dedicated feedback channels facilitate meaningful engagement, while our grievance mechanisms, independent impact assessments, monitoring and evaluation processes maintain transparency, effectiveness, and long-term sustainability. Through these efforts, we remain committed to creating lasting value for communities and driving sustainable progress nationwide.

Tobe Okigbo

Chief Corporate Services &
Sustainability Officer (CCSSO)

Industry Memberships

At MTN Nigeria, our participation in industry memberships reflects our commitment to collaboration, innovation, and leadership in shaping the future of telecommunications. In 2024, we deepened our engagement with industry bodies and advocacy organisations-key platforms driving innovation, policy influence, and best practice in telecommunications. Our active membership fosters collaboration with stakeholders at all levels, promoting meaningful dialogue and industry advancements.

Beyond industry progress, we recognise our broader responsibility to address global challenges such as climate change, digital inclusion, and socio-economic development. Aligned with the UN SDGs and the Paris Climate Agreement, we are committed to strategic partnerships that foster inclusive growth, environmental stewardship, and sustainable business practices.

As an industry leader, we consistently pursue opportunities to expand our impact, shape policies, and support initiatives that foster shared prosperity and long-term sustainability in our communities.

Our Contribution to Global Issues and the SDGs

In 2024, we deepened our commitment to the United Nations Sustainable Development Goals by further integrating them into our business strategies, operations, and community initiatives, building on the strong foundation we established in previous years.

Our Leadership and Oversight Structure

At MTN Nigeria, our Board of Directors and Executive Team are dedicated to upholding the highest standards of corporate governance. Our governance policies and practices are designed to create long-term value while fulfilling our responsibilities to shareholders and stakeholders alike.

The Board provides strategic oversight, ensuring that the company operates with integrity, accountability, and transparency. As outlined in the Board Mandate, its key responsibilities include monitoring corporate performance and ensuring that management possesses the expertise, depth, and continuity required to achieve MTN Nigeria’s strategic objectives.

By maintaining strong governance structures, we strengthen trust, drive sustainable business growth, and remain committed to delivering lasting value to all our stakeholders.

The Board has seven committees:

- Board Audit.
- Risk Management and Compliance.
- Remuneration and Human Resources.
- Nomination and Governance.
- Social, Ethics and Sustainability.
- Finance and Investment.
- Digital and Innovation.

As of December 31 2024, the Board consisted of fourteen members, eleven males (78.6%) and three females (21.4%).

Following the retirement of a member (male) during the year, the Board included three independent directors on the Board, making up 21.4% of its composition. Additionally, two executive directors were part of the Board, representing 14.3%, while the remaining twelve members (85.7%) were non-executive directors. The average age of Board members is 60 years.

For more details on our Board, its members, committees, and governance practices, please refer to the Corporate Governance section in our 2024 Annual Report.

Read the corporate governance report in our 2024 annual report

Sustainability Governance

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

Our governance framework is essential in supporting both our business and sustainability strategy, offering a structured approach to setting objectives, monitoring performance, and managing risks. Each governance committee operates under clear terms of reference, outlining roles, responsibilities, composition, and authority.

The Social, Ethics, and Sustainability Committee (SESCO) is responsible for overseeing our strategy, targets, and progress, ensuring that sustainability is embedded across the organisation. SESCO receives

quarterly updates on management's efforts to mitigate risks and ensure accountability in delivering our sustainability framework.

This year, our Board of Directors and Executive Committee participated in an executive education programme at INSEAD. The programme, designed to promote inclusive and sustainable business practices, equipped our leaders with the skills to navigate diversity, equity, and inclusion (DEI) while aligning corporate goals with sustainable economic practices.

The programme also explored the intersection of corporate reporting, environmental and social impact, and financial performance, addressing challenges in sustainability measurement, reporting, and evolving regulations. Importantly, the programme reinforced sustainability as a strategic opportunity, integrating it with business profitability, and aligning with global frameworks such as the UN Sustainable Development Goals (UN SDGs) and Environmental, Social, and Governance (ESG) standards.

Board Skills and Experience

The MTN Nigeria Board of Directors is composed of experienced and skilled professionals, bringing diverse expertise and perspectives to govern our organisation effectively.

Management’s Role in Sustainability at MTN Nigeria

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

At MTN Nigeria, our management team drives business success, sustainable performance, and strong governance. In 2024, our leadership strengthened its commitment to Environmental, Social, and Governance (ESG) responsibilities through active involvement in embedding sustainability across our operations, ensuring regulatory compliance, and improving employee welfare.

Aligned with Ambition 2025 strategy, our management is responsible for transforming strategic plans into actionable goals, ensuring efficient resource management, product and service delivery, and promoting a culture of compliance and accountability. The CEO and senior executives play a key role in managing climate-related risks and opportunities, maintaining compliance with local and international regulations, and upholding a strong risk governance ethos. Advanced tools, such as risk dashboards, enable continuous monitoring, assessment, and mitigation of key risks.

Sustainability is a core focus, with management

spearheading initiatives to reduce our environmental footprint and achieve net-zero emissions by 2040. We promote diversity and inclusion, strategic community engagement, and responsible supply chain management to ensure ethical and sustainable practices. Beyond internal efforts, our executive team actively engages with regulatory bodies, investors, and customers, transparently communicating sustainability performance to align our operations with stakeholder expectations and global best practices. Through proactive leadership and responsible business practices, MTN Nigeria’s management drives long-term value creation and sustainable growth.

Annually, an external consultant conducts a holistic evaluation of the Board to assess and evaluate the effectiveness and corporate governance performance. It also involves the identification and assessment of knowledge gaps and opportunities to advance the collective knowledge of the Board. In response to the evaluation, the outcome of the independent evaluation is communicated to the responsible Board committees

for oversight, with the Nomination and Governance Committee responsible for monitoring the implementation of recommendations. PricewaterhouseCoopers (PwC) executed this evaluation in 2024 and found that MTN Nigeria’s Corporate Governance approach regarding enterprise risk management, financial and non-financial reporting, and deployment of the Company’s human, material and financial resources in relation to the sustainability objectives of the Company are well established. Consequently, PwC confirmed that MTN Nigeria factored corporate governance best practice and sustainability-related considerations into the core of its operations, in line with organisational goals and corporate governance principles.

The report of the independent evaluation consultant is disclosed in our 2024 Annual Report.

Operational Policies and Guiding Principles

- Introduction
- Our Sustainability Context
- Governance
- Strategy
- Risk Management
- Metrics & Targets
- Appendix

Our governance system rests on robust policies and guidelines that ensure accountability, transparency, and ethical practices. Reflecting our commitment to business ethics, risk management, employee well-being, sustainability, and regulatory compliance, we implemented 82 policies, processes, and procedures in 2024, 26 of which focused on sustainability. By aligning with industry standards and best practice, these measures enhance our sustainability performance and drive long-term value creation.

Approved at the highest level, these policies govern all activities and relationships with MTN Nigeria. Our Conduct Passport establishes our code of conduct, ensuring that both employees and business partners understand their roles in upholding our commitments. We embed these principles during on boarding of new employees, periodic training and awareness sessions. Suppliers are required to acknowledge and confirm their understanding of our policies during registration, and we maintain adherence through ongoing communication, announcements, and additional training as needed.

To ensure internal stakeholders are informed and aligned with our policy commitments, we engage employees through various channels, including awareness and online training sessions, periodic in-person training and leadership messages, regular policy updates and training conducted by policy owners and the Operational Compliance team.

We measure the effectiveness of training and awareness activities through training feedback, employee interviews and maturity surveys, themes from reported misconduct and disciplinary actions, and periodic trend analysis on misconduct and surveys. Our training programmes are regularly reviewed to ensure they remain relevant and impactful in implementing our policy commitments.

Strategy

Our Strategy

Introduction

Our strategy is not just a road map - it is rooted in innovation and driven by a strong belief that everyone deserves the benefits of a modern, connected life. Ambition 2025 defines our priorities and delivers value, harnessing core drivers like our stakeholders, Environmental Social and Governance (ESG) practices, and high-end technological advancement.

Our Sustainability Context

Our priorities include building Nigeria's largest and most valuable platforms, leading in industry-leading connectivity operations, and accelerating portfolio transformation while driving shared value. With care, integrity, agility, and respect, we continuously innovate, challenge limits, and work toward building a more inclusive and connected future.

Creating Value

At MTN Nigeria, value means empowering our customers with seamless access to an inclusive, connected world built on innovation, trust, and accountability. We achieve this by delivering tailored services and solutions designed to meet diverse needs. Our product offerings cater to three key customer segments: Consumers, Enterprise, and Wholesale. Through these segments, we provide innovative solutions that enhance connectivity and drive meaningful impact.

For more details on our products and service, please refer to the Ambition '25, Strategy and Business Model section in the 2024 Annual Report.

MTN

Our Telecom Footprint

MTN Nigeria connects millions of customers, enabling seamless communication, robust internet connectivity, and digital solutions that power businesses and enhance lives across varying customer needs and preferences. Across the nation, from metropolis to remote villages, we are expanding our extensive footprint, staying true to our commitment to bridging the digital divide. Through innovative solutions and robust network infrastructure, we are driving inclusive connectivity nationwide.

Our Sustainability Blueprint

Introduction

At MTN Nigeria, sustainability is more than a commitment, it is at the core of our operations, shaping how we create value for the environment, society, and economy. Our approach blends visionary leadership with actionable strategies, ensuring that sustainability is embedded in everything we do, from greener operations to socially impactful initiatives.

Our Sustainability Context

Leading this effort is our Social, Ethics, and Sustainability Board Committee, which ensures that our ambitions translate into measurable impact. Through strategic oversight, the Board and its committees navigate the intersections of economic growth, environmental stewardship, and societal progress, proactively addressing risks and opportunities that shape our shared future.

Governance

Strategy

We are not just imagining a cleaner, more inclusive future; we are actively building it today, anchored on the following principles:

Risk Management

Doing for planet

We are resolutely committed to environmental stewardship, aiming for net zero emissions by 2040. Our efforts focus on mitigating our environmental footprint and actively reducing our carbon emissions.

Metrics & Targets

Doing for people

Promoting digital and financial inclusion and nurturing a diverse society are fundamental to our sustainability endeavours. By facilitating socio-economic development, we foster opportunities for community advancement, remaining transparent and accountable to stakeholders while striving to enhance lives through modern connectivity.

Appendix

Doing it right

We acknowledge the indispensable role of governance in sustainability, advocating for ethical conduct, effective risk management, and regulatory compliance. Adherence to local and global governance standards form the cornerstone of our commitment to building trust and delivering sustainable value.

Doing for growth

Our operations significantly contribute to Nigeria's economy, generating substantial economic value. We continually expand our network infrastructure to deliver quality services, driving mobile and internet adoption and fostering inclusive economic growth.

On this journey, stakeholder insight drive our priorities through a materiality assessment process aligned with frameworks such as the Global Reporting Initiative (GRI), Sustainability Accounting Standards Board (SASB), and considerations for IFRS S1 and S2. These inputs have enriched our sustainability strategy and initiatives.

Reflecting stakeholder expectations and our unwavering commitment to sustainability, we have achieved notable progress in both internal and external initiatives. We remain dedicated to navigating risks and opportunities, consistently creating value for our stakeholders.

Our ESG Framework

Our 2024 Performance

	Strategy	Commitment	Objective	Ambition	2024 Performance
Introduction		We are committed to protecting our planet.	Moving towards zero emissions and a cleaner energy supply.	50.3% average reduction in absolute emissions (tCO ₂ e) for Scopes 1, 2 and 3 using 2021 as the baseline, in line with our 2030 SBTi targets and net zero by 2040.	101,300 tCO ₂ e GHG emissions for Scope 1 and 2.
Our Sustainability Context					11% reduction for Scope 1 and 2 against the 2021 baseline.
Governance					Implemented Project GreenCycle.
Strategy					Launched eco-friendly SIMs.
Risk Management		We are committed to driving digital financial inclusion and a diverse society.	Accelerating digital inclusion.	95% broadband coverage by 2025.	90.1% broadband penetration.
Metrics & Targets			Driving financial inclusion.	30 – 40 million active wallets by 2025.	2.8m Active MoMo subscribers (wallets) 75,783 Active MoMo Agents.
				>15m Ayoba users by 2025.	6.3m Ayoba subscribers.
			Fostering a more diverse and inclusive society.	50% female representation by 2030.	41.4% female representation, up by 2.7pp.
Appendix		We are committed partners and stakeholders to creating and protecting value	Safeguarding our people and customers.	Reputation Index ≥ 75%.	Reputation Index 79% above the target benchmark of 75%.
			Embedding ethical and responsible business practice.	Top quartile ESG ratings.	Rated 3.6 (excellent) out of 4.0 (excellent) on the Risk Insights ESG GPS sustainability rating system. Up 0.2pp.
		We are committed to boosting inclusive economic growth.	Contributing to economies through tax.	Tax contribution.	N764.2 billion in income taxes, duties and levies paid to the government, up 39.1%.
			Investing in network and IT infrastructure to unlock growth.	Network development spend.	N443.5 billion in capital investment (capex) excluding leases down by 1.3%.
			Empowering local enterprises.	Empower local enterprises.	Local spend up to N1.48 trillion, up 4.8pp.
			Unlocking local ownership.	11% localisation by 2025.	3% localisation.

Sustainability-Related Risks and Opportunities

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

Sustainability is at the heart of everything we do at MTN Nigeria, shaping our strategies to deliver value for a diverse group of stakeholders. Guided by Environmental, Social, and Governance (ESG) factors, we recognise that sustainability can both challenge and enhance our business model and long-term viability. This understanding is integrated into our Risk Management approach.

Our risk management process is essential to our decision-making - from strategy development and business planning to capital allocation and daily operations. By evaluating sustainability issues through our stakeholders' perspectives, we ensure that material risks and opportunities are addressed effectively. For more information, *please refer to the section on Material Matters in Focus.*

Across our identified Sustainability-Related Risks and Opportunities (SRROs) on the table below, new developments in the global ESG space stand as the emerging risk issues or scenario demanding strategic actions. Through a proactive risk management strategy, we not only mitigate potential threats but also capitalise on opportunities aligned with global sustainability trends and stakeholder expectations. For more information on our risk management strategy, *please refer to the section on Risk Management.*

Sustainability-Related Risks & Opportunities (SRROs)

Inherent Risk Drivers		Current Risk Issues & Opportunities	Management Actions	Progress On Actions
Introduction	Digital Rights	1. Growing consumer awareness and concerns regarding digital rights.	1. Publish digital rights standards and policies.	1. The Board approved our Digital Rights Policy.
Our Sustainability Context		2. Risk of fines or imprisonment from non-compliance with Law Enforcement Directives on network shutdowns, throttling, and related issues.	2. Ensure adherence to our Digital Rights Policy.	2. Digital Rights Policy training and attestation are ongoing on ULearn.
Governance		3. Potential reputational damage due to mismanagement of digital rights and non-compliance with data privacy laws.	3. Establish a rigorous digital rights due diligence process.	3. A Digital Rights Impact Assessment was completed.
Strategy		4. Risk of negative consumer response resulting from the implementation of Law Enforcement Directives.	4. Continually raise consumer awareness on data privacy stance and address any emerging concerns.	4. Phishing simulation exercises conducted to educate employees on identifying and responding to phishing attacks, including recognising suspicious emails, avoiding malicious links, and reporting threats.
Risk Management		5. Opportunity to secure capex for initiatives aimed at bridging the digital divide.	5. Regular vulnerability testing and assessments carried out to identify and mitigate potential data privacy risks, safeguarding sensitive information and upholding the trust of our stakeholders.	5. A quarterly Digital Rights risk monitoring report was developed.
Metrics & Targets	Sustainable supply chain	1. Failing to comply with the Local Content policy may hinder our ability to advance local content development in tandem with the policy direction of the Federal Government of Nigeria.	1. Regularly monitor, measure, and report adherence to MTNN's Local Content Policy, with periodic reviews and quarterly updates to the Board on any deviations.	1. The first phase of increasing Nigerian ownership was completed in December 2021, adding over 100,000 new shareholders.
Appendix		2. Insufficient training for stakeholders on the policy may result in ineffective implementation.	2. Provide ongoing training to ensure all employees are well-versed in the local content policy.	2. Local spending increased by 47.5% year-on-year, rising from N1,006.3 trillion in 2023 to over N1,484.7 trillion in 2024, significantly boosting local value creation.
		3. Reputation risk of being perceived as a foreign (South African) brand that lacks commitment to localisation and local content development.	3. Actively promote local content through initiatives in procurement, recruitment, skill development, community development, SME support, supplier development, ownership transactions, local employment, and indigenous ownership schemes.	3. Our workforce is continuously upskilled via ULearn, ensuring employees are equipped with critical, future-ready skills.
		4. Localisation of our supply chain to mitigate exposure to foreign exchange volatility and associated economic risks.	4. Redenomination of foreign currency contracts to local currency to mitigate currency risk.	

Sustainability-Related Risks & Opportunities (SRROs) contd.

	Inherent Risk Drivers	Current Risk Issues & Opportunities	Management Actions	Progress On Actions
Introduction	Board Diversity	1. Insufficient diversity at the Board and executive levels restricts diverse perspectives, hindering strategic oversight and comprehensive deliberation. 2. ESG raters may assess MTN as lacking diversity, which could negatively affect stakeholder perception.	1. Implement sound policies, including the Board Appointment and Succession Planning Policy and the Diversity and Inclusion Policy. 2. Advance our diversity & inclusion strategy by fostering an inclusive workplace that prioritises equal opportunity and non-discrimination. 3. Establish regular tracking and reporting on Diversity, Equity, and Inclusion (DEI) commitments.	1. Implemented initiatives to enhance gender diversity within the organisation. 2. Gender diversity has been acknowledged as a key factor for the next Board refresh.
Our Sustainability Context				
Governance				
Strategy	Emerging ESG Regulations	1. Increasing regulatory and stakeholder expectations for more transparent and comprehensive ESG disclosures. 2. Potential fines, penalties, legal sanctions, operational shutdowns, or imprisonment for non-compliance with regulations. 3. Increased costs associated with compliance with new legislation, including emissions pricing, carbon taxation, and emissions trading schemes.	1. Create a dedicated Sustainability function to track progress on ESG KPIs, initiatives, programmes, and policies, ensuring alignment with strategy and overall ambitions. 2. Ensure transparent ESG disclosures through the annual Sustainability Report while periodically addressing identified gaps. 3. Continuously monitor climate and environmental regulations to ensure compliance. 4. Strengthen collaborations with industry bodies, governments, and communities for enhanced stakeholder engagement. 5. Engage policymakers to advocate for appropriate carbon regulation and fiscal measures. 6. Implement ongoing environmental awareness and eco-responsibility campaigns to promote sustainable business practices.	1. Established a dedicated Sustainability & Shared Value Department to coordinate our efforts to embed sustainability principles into our operations. 2. Quarterly reporting on ESG progress and milestones to the Social, Ethics, and Sustainability Committee (SESCO). 3. Enhanced ESG performance disclosures through the annual Sustainability Report. 4. Early adoption of the International Sustainability Standards Board (ISSB) Sustainability Reporting Standards. 5. Sustainability Report submitted to the Nigerian Exchange Limited (NGX) and disclosed to all stakeholders. 6. Ongoing engagement with regulatory authorities to stay ahead of emerging sustainability regulations.
Risk Management				
Metrics & Targets				
Appendix				

Climate-Related Risks and Opportunities

Introduction

Climate risks pose both challenges and opportunities for our business operations and service delivery. To maintain service reliability, business continuity, and long-term sustainability, we have taken proactive steps to understand and address these risks. While third-party partners manage our telecommunications infrastructure, climate-related risks have direct implications for our operations, revenue, and long-term strategy. These insights guide our strategic investments and business operating model, enhancing our resilience to climate change.

Our Sustainability Context

Governance

To effectively identify and prioritise climate risks and opportunities, MTN Nigeria conducted a climate scenario analysis to assess and mitigate climate-related challenges. We classify climate risks into two main categories:

Strategy

- **Physical Risks:** These include extreme weather events, heatwaves, and power supply disruptions, all of which can impact telecom service reliability and performance.

Risk Management

- **Transition Risks:** These encompass regulatory changes, technological advancements, supply chain disruptions, and market shifts that may affect our operations.

Metrics & Targets

Our assessment of these risks and corresponding mitigation strategies are outlined in the Climate-Related Risks table in the following pages. Aligned with our Greenhouse Gas (GHG) emission reduction strategy, MTN Group signed a pledge with the Science Based Targets Initiative (SBTi) in 2021, committing all operating entities to a Net Zero ambition. In support of this, MTN Nigeria is implementing energy-efficient technologies and renewable energy solutions to reduce Scope 1 and Scope 2 emissions, engaging our suppliers and stakeholders to drive Scope 3 emissions reduction.

Appendix

Through these efforts, we continue to consolidate climate action into our business strategy, contributing to a low-carbon future.

Climate-Related Risks

Time Horizon: Short-term to Medium-term

Physical Risks

Type	Description	Impact	Mitigation Strategies
Introduction	Heat waves and Extreme heat	Risk of damage to telecommunication towers, cables, and equipment, leading to service disruptions.	Advanced cooling systems, improved ventilation, more resilient components, proactive maintenance.
Our Sustainability Context		Higher energy consumption, increased operational costs.	Alternative energy-efficient cooling solutions.
Governance	Urban Heat Domes and Island (UHI)	A pollution dome and an urban heat island (UHI) are interconnected phenomena that occur in densely populated areas.	Advanced cooling systems, improved ventilation, more resilient components proactive maintenance.
Strategy		Persistent high temperatures, cumulative stress on systems.	Alternative energy-efficient cooling solutions.
		Higher energy consumption, increased operational costs.	
Risk Management	Flooding and Coastal Erosion	Potential network outages due to submerged equipment and/or limited access to facilities.	Elevated structures, effective drainage systems, Geographic Information System (GIS)-based risk assessment.
Metrics & Targets		Network Reliability: Risk of service disruptions and damage to terrestrial network components.	

Transition Risks

Type	Description	Impact	Mitigation Strategies
Regulatory Changes	Introduction of new regulations promoting sustainable practices.	Increased costs associated with adopting and adhering to new environmental regulations.	Engage with policymakers to advocate for appropriate environmental and climate measures like carbon regulation and implementing measures to ensure compliance.
			Transition to net zero across our value chain (Scope 1, 2 and 3) by 2040 to minimise risk exposure.

Transition Risks Contd.

Type	Description	Impact	Mitigation Strategies
			Attract investment, foster customer loyalty, and enhance overall market position by meeting and exceeding regulatory expectations
Technological advancements	Rapid evolution of technologies impacting traditional telecom infrastructure.	Need for continual investments in new technologies and potential obsolescence of existing infrastructure.	Fostering a culture of innovation and investing in research and development to build capacity and stay ahead of technological advancement while also building strategic partnerships with key technology providers.
Supply chain disruptions	Dependency on global supply chains for electronic components.	Potential delays and increased costs due to disruptions in the supply chain.	Explore local and regional partners where possible and engage partners in our value chain in strategic contractual arrangements that keep MTN prioritised.
Market dynamics	Shift in consumer preferences towards eco-friendly telecom services.	Changing expectations for sustainable and environmentally responsible telecom services.	Conducting market research to understand shifting consumer preferences and adapting service offerings accordingly. Investing in marketing and communication strategies to highlight initiatives implemented that are eco-friendly and mitigate climate risks.
Transition to renewable energy	Adoption of renewable energy sources for powering telecom infrastructure.	Impact on costs associated with transitioning to and maintaining renewable energy solutions.	Investing in renewable energy infrastructure, implementing hybrid energy models such as solar panels and Independent Power Providers (IPPs), optimising efficiency with targeted infrastructure (e.g sensor lighting etc.) to power facilities. Collaborating with energy providers and government agencies to facilitate the transition.

Climate-related Opportunities

Type	Description	Timeline	Time frame of Impacts
Energy cost reductions	The costs of electricity generated from renewable energy are lower than those from fossil-fuel energy and are expected to fall further. This can potentially result in lower operating costs from electricity use, either through lower market prices, cheaper Power Purchase Agreements (PPAs) or on-site renewable energy generation.	Short-term to Medium-term	Short term: 1-5 years
Sustainable procurement	Continued integration of ESG (including carbon footprint) into supplier procurement processes can lead to reduced operating costs.	Medium-term to Long-term	Medium term: 6-10 years
Products and services innovation	Integration of climate impact and carbon enablement into the design of products and services and low-carbon solutions that can enable customers to better manage climate-related impact.	Long-term	Long term: >10 years

Impact of Risks and Opportunities Across our Business

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

Impact on our Business Model, Strategy, Decision Making and Value Chain

We incorporate Sustainability Related Risk and Opportunities (SRROs) and Climate-Related Risks and Opportunities (CRROs) into our core business strategy, positioning sustainability as a key driver of decision making - from strategy development and business planning to capital allocation and daily operations. By evaluating sustainability issues through our stakeholders' perspectives, we ensure that material risks and opportunities are addressed effectively. **(refer to Material Matters in Focus for more information).**

Since the launch of Ambition 2025, we have prioritised infrastructure development to address SRROs and CRROs. Our ongoing upgrades such as solar hybrid and energy-efficient systems help reduce carbon emissions and cut operating costs. At the same time, we are accelerating innovation with eco-friendly digital solutions, including West Africa's first eco-friendly SIM cards. Our sustainability strategy is shaped by SRROs and CRROs, taking into account market demand for greener telecom services, evolving regulatory requirements, and environmental challenges like extreme weather.

These risks and opportunities also play a crucial role in shaping our supply chain strategy in the short, medium, and long term. Given that a significant portion of our telecommunications infrastructure—including network towers and fibre optic cables—are outsourced to third-party providers, supplier engagement is critical in our Net Zero journey. Suppliers account for the largest share of our Scope 3 emissions, so we have strengthened our procurement processes by integrating contractual sustainability commitments. We are also actively engaging our suppliers to align with our carbon reduction goals, urging them to pledge to reduce Scope 3 emissions, and set science-based emission reduction targets by 2026, publicly disclosing progress on their sustainability commitments.

Beyond our supply chain, we are collaborating with regulatory bodies, industry stakeholders, and sustainability experts to align our sustainability approach with Nigeria's Energy Transition Plan, ensuring that we contribute meaningfully to the country's long-term plans.

Impact on our Financial Position, Performance and Cashflow

Climate-related risks and opportunities have a direct financial impact on our operations, investment strategy,

and long-term business sustainability. We integrate SRROs and CRROs considerations into our financial planning, risk management, and capital allocation to enhance business resilience and drive value creation.

Extreme weather events, such as floods, heatwaves, and severe storms, pose significant risks to our network infrastructure, data centres, and fibre optic network. In 2024, we experienced flooding in Borno state which impacted eighty-two base stations, of which sixty-six have been restored. In another event, thunderstorms and windstorms affected sixteen sites, causing equipment damage and an estimated financial impact of N128 million.

The evolving regulatory landscape—in the lead-up to the implementation of the Nigerian National Carbon Plan—creates significant uncertainty, making it difficult to reliably estimate future compliance costs or assess their potential financial and operational implications. While a precise carbon tax rate remains undefined, its eventual implementation could materially impact our operating expenses. Our energy-intensive infrastructure, spanning data centres, cell towers, and network equipment, necessitate careful planning to mitigate potential increases in carbon tax liabilities, which could lead to higher insurance premiums and reduced profitability.

Our commitment to reducing our carbon footprint requires substantial capital expenditure across several key initiatives, including renewable energy solutions,

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

such as solar hybrid energy systems; network resilience enhancements to expand mobile and internet adoption; infrastructure upgrades to facilitate socio-economic development; and Corporate Social Investment (CSI) initiatives, with 1% of profit after tax allocated through the MTN Foundation to drive social impact. While these investments require upfront costs, they are strategically positioned to yield long-term financial and environmental returns through cost efficiencies, innovation, and strengthened partnerships.

Sustainability and ESG performance are becoming key investment criteria for financial institutions, opening opportunities for low-cost financing for related projects. Additionally, the increasing consumer demand for climate-friendly solutions presents opportunities for new green products and services, fostering financial growth and ESG-aligned partnerships.

Climate Resilience

Our Net Zero strategy underscores our commitment to mitigating the impacts of climate change and ensuring sustainable business operations. **In 2024, we performed a climate scenario analysis** across diverse temperature projections to bolster our climate adaptation and mitigation strategies. This initiative allows us to identify, assess, and mitigate both physical and transitional climate risks, ensuring operational resilience and business continuity in the face of evolving climate challenges.

To support this analysis, we leveraged Copernicus Satellite Data, which provides advanced climate

monitoring and predictive modelling. This system utilises Shared Socioeconomic Pathways (SSPs), a framework designed to examine how global society, demographics, and economies may evolve over the next century under different climate scenarios.

Our assessment focused on SSP2-4.5, an intermediate emissions scenario where carbon dioxide (CO₂) emissions remain near current levels until 2050 before gradually declining, though without achieving net zero by 2100. By analysing a range of temperature scenarios, from 1.5°C to >2.8°C, we gained critical insight into the potential risks and opportunities that could arise in the coming decades.

These insights help shape our climate adaptation and mitigation strategies, ensuring that MTN Nigeria remains resilient while aligning with global and national climate goals. Our proactive approach enables us to navigate regulatory shifts, optimise energy efficiency, and explore sustainable innovations that drive long-term value for our stakeholders.

Anticipated Temperature Increases and Corresponding Climate Scenarios

These scenarios present challenges that our business could face in the future. We are, through our sustainability initiatives and governance processes, working to mitigate these challenges, and are adopting the under-listed climate-related risk management strategies to strengthen our resilience.

Short-Term (0-3 Years)

Immediate actions to mitigate risks and incorporate climate considerations into business operations. Priority should be placed on third-party emissions data emanating from the MTN – ERM climate data portal for MTN Nigeria, particularly as Scope 3 emissions represent a significant percentage of estimated emissions from this source, estimated at 1 million tonnes of Co₂ annually.

Component	Action	Goal
Freehold and Leasehold Buildings	Conduct energy audits and implement energy efficiency measures in a phased manner where practical.	Reduce energy consumption and GHG emissions through improved lighting, heating, and cooling systems.
Telecommunications Towers	Assess and upgrade infrastructure resilience against extreme weather events. This can be undertaken with contractual provisions with service providers over time.	Ensure towers can withstand increased temperatures, high winds, storms, and lightning strikes. Encourage service providers to embark on an energy transition strategy in line with our overall Co ₂ emission-reduction strategy.
Data Centres	Enhance cooling efficiency and integrate renewable energy sources.	Minimise electricity consumption and associated emissions. Look to transition away from diesel into LNG / CNG where practical to do so.
Operational Vehicles	Implement fuel-efficient practices and explore alternatives like electric vehicles.	Reduce fossil fuel consumption and GHG emissions.
Aviation	Optimise flight routes and consider carbon offsetting initiatives.	Reduce emissions from business-related air travel.

Medium-Term (3–5 Years)

Focus: Broaden strategies to integrate climate resilience into operations and drive further emission reductions.

Introduction Our Sustainability Context Governance Strategy	Component	Action	Goal
	Freehold and leasehold buildings	Invest in green building certifications and sustainable construction practices where ownership and leasehold allow.	Achieve significant reductions in operational emissions and align with green building standards.
	Telecommunications towers	Implement advanced monitoring systems for climate impact assessments through contractual negotiations and agreements with third-party service providers for this function.	Improve real-time response and maintenance capabilities to minimise service disruptions.
	Data centres	Transition to renewable energy sources and implement advanced cooling technologies, where contracts and other actions are practical to do so.	Achieve a substantial reduction in GHG emissions and enhance data centre resilience.
	Operational vehicles	Expand the fleet of electric or hybrid vehicles and optimise logistics.	Lower overall vehicle emissions and improve fleet efficiency.
	Aviation	Review domestic and international logistics and create a planned reduction strategy where practical.	Reduce the carbon footprint of aviation activities in a structured manner.

Long-Term (5–20 Years)

Focus: Embed climate resilience and sustainability into the core business strategy, aiming for long-term environmental stewardship.

Risk Management Metrics & Targets Appendix	Component	Action	Goal
	Freehold and leasehold buildings	Retrofit existing buildings to exceed current sustainability standards and integrate advanced energy management systems.	Achieve near-zero emissions buildings and lead industry standards where contractual provisions allow and where it is practical to do so.
	Telecommunications towers	Develop and implement climate-resilient designs and materials.	Ensure all towers are built to withstand future climate conditions and reduce maintenance needs. This needs to be undertaken through contractual provisions with service providers and budgets allocated in terms of cost sharing and where practical and reasonable to achieve.
	Data centres	Transition to fully renewable energy sources and explore innovative cooling solutions in both freehold and leasehold locations where it is practical.	Operate data centres with minimal environmental impact and set industry benchmarks.
	Operational vehicles	Achieve a fully electrified fleet and establish comprehensive sustainability practices for transportation.	Minimise transportation emissions and integrate with broader corporate sustainability goals.
	Aviation	Pursue industry-leading practices for low-emission aviation and participate in emerging strategies to achieve this.	Reduce aviation trips and resultant emissions significantly and contribute to global efforts for an emission reduction strategy.

Risk Management

Risk Management

MTN Nigeria is committed to safeguarding its business by integrating global best practices in risk management, operational resilience, and cybersecurity. To navigate the evolving digital and regulatory environment, we are continuously enhancing our governance framework and reinforcing business continuity measures, maintaining trust and stability. To ensure the effectiveness of risk assessment across all levels, we adopt the ‘Three Lines’ model approach, which ensures alignment of risk management activities at all levels and clarifies distinct roles and responsibilities among Governance, Management, and Assurance functions. The Board of Directors and senior management provide oversight and strategic direction, establishing risk tolerance and framework. Operational managers and business units implement risk management practices within their respective areas, and identify and mitigate risks as part of daily operations. Also, internal audit, compliance, and other assurance functions independently assess and validate the effectiveness of risk management processes, assuring stakeholders and management.

Identification, Assessment and Management of SRROs and CRROs.

We have a structured risk management approach to identifying, assessing, and mitigating SRROs and CRROs. It is important to note that these sustainability-related risks extend beyond environmental concerns to encompass economic, social, and governance factors.

Key SRROs Considered in 2024

Introduction Our Sustainability Context Governance Strategy Risk Management	SRRO Category	Risk / Opportunity	Response / Strategy
	Resource Efficiency	Risk of unsustainable energy consumption.	Adoption of renewable energy solutions and energy-efficient technologies.
	Human Capital Development	Opportunity to improve workforce skills and diversity.	Investment in employee training and leadership programmes.
	Regulatory & Compliance	Risk of non-compliance with sustainability regulations.	Proactive alignment with national and international sustainability standards.
	Cybersecurity & Data Privacy Risks	Addressing vulnerabilities in digital operations, protecting customer and business data.	Strengthening cybersecurity protocols, deploying AI-powered threat detection systems, and conducting external IT audits.
	Community & Stakeholder Risks	Managing the socio-economic impact of business operations, ensuring inclusivity in decision-making.	Regular consultations with employees, stakeholders, and regulatory agencies.
	Labour & Human Rights Risks	Ensuring compliance with fair labour practices, preventing child/forced labour risks.	Supplier and Partner due diligence by carrying out pre-qualification assessments, compliance audits, and third-party oversight.
	Workplace Safety Risks	Exposure to hazardous materials, electrical works, and construction-related dangers.	Occupational safety training, risk assessments, and compliance with health and safety laws.

Key CRROs Considered in 2024

Metrics & Targets Appendix	CRRO Category	Risk / Opportunity	Response / Strategy
	Physical Risks	Risk of flooding and infrastructure damage due to climate change.	Climate resilience planning through flood risk mitigation strategies, infrastructure upgrades, and disaster recovery protocols. Also through the construction of high-concrete plinths and metal platforms to protect critical infrastructure.
	Transition Risks	Regulatory shifts in carbon taxation and emission reduction policies.	Implementation of low-carbon business strategies and sustainable procurement policies.
	Renewable Energy Opportunities	Expansion into solar and alternative energy solutions.	Investment in off-grid renewable energy for operational sites.
	Carbon Footprint Management	Ensuring progress towards net-zero goals through effective carbon management strategies.	Carbon Footprint Reduction through continuous commitment to Scope 1, 2, and 3 emissions reduction.
	Regulatory & Compliance Risks	Adhering to climate-related regulations, carbon reduction targets, and environmental sustainability policies.	Environmental compliance by aligning with ISO 14001 environmental management system and Nigeria's national climate policy.

Embedding ESG Risk Assessment in Our Operations

Strategically embedding ESG risk assessment into our operations, we utilise a framework consistent with ISO 31000 and the COSO Enterprise Risk Management (ERM) framework. This process involves: identification of ESG risks; focused risk analysis and prioritisation, (particularly on climate change, social equity, and governance); deployment of proactive mitigation strategies; and rigorous ongoing monitoring and review.

Our ESG risk management prioritises: regulatory compliance with national and international laws (e.g., Factories Act, ILO OSH, Nigeria Labour Law, ISO 45001); proactive hazard identification and risk assessment; effective incident resolution using the 5Ys method for accident investigation; continuous stakeholder engagement; and thorough third-party oversight. Regular assessments ensure adaptation to emerging risks, while ISO 22301 and ISO 27001 compliance bolster our resilience against cybersecurity, environmental, and operational disruptions.

Our Commitment to Compliance and Best Practices

To ensure our operations align with both regulatory requirements and international standards, we have embedded several compliance measures:

Regulatory Framework	Description
National Policy on Occupational Safety & Health (2020)	Aligns with international workplace safety standards to protect employee well-being.
Factories Act CAP F1 LFN 2004	Regulates workplace safety, risk assessments, and industrial hazard prevention.
Nigerian Labour Law 2004	Establishes workplace rights, safe working conditions, and employee welfare provisions.
NIST Cybersecurity Framework	Supports the development of robust cybersecurity measures against emerging threats.
PCIDSS (Payment Card Industry Data Security Standard)	Supports secure payment transactions and protects financial data from fraud.

Our Commitment to ISO Standards

MTN Nigeria marked a key milestone in 2024 by securing the ISO 37301:2021 certification for its Compliance Management System (CMS). This achievement is particularly noteworthy as MTN Nigeria is the first Nigerian organisation, the first telecommunications company in the country, and the first MTN operating entity to be CMS-certified by the International Accreditation Service (IAS).

This certification reinforces our compliance with local and international regulations, strengthening our commitment to a transparent, accountable, and ethical business environment. We remain dedicated to continuous improvement, upholding ISO certifications across key areas of our operations. These certifications reflect our adherence to international best practice, regulatory standards, and our pursuit of operational excellence.

1. ISO 27001:2022: Information Security Management System (ISMS)

We have an operationalised Information Security Management System (ISMS) that is formally certified and compliant with ISO 27001:2022. This standard ensures resilient data security protocols, continuous risk assessments, and proactive mitigation strategies are instituted to protect customer data, business information, and network infrastructure.

2. ISO 22301: Business Continuity Management System (BCMS)

We have attained the ISO 22301 certification, ensuring that critical operations remain resilient in the face of emergencies, cyber threats, and operational disruptions. This framework allows us to safeguard our network infrastructure and business continuity planning, enabling quick recovery and minimal service disruptions.

3. ISO 31000: Enterprise Risk Management (ERM)

Our risk management framework aligns with ISO 31000, enhancing our ability to anticipate, assess, and mitigate risks across financial, operational, and environmental domains. This ensures sustainable business performance and regulatory compliance.

4. ISO 45001:2018 Occupational Health and Safety Management System (OHSMS) (Planned for Implementation)

While we are not yet fully subscribed to ISO 45001, we have implemented a comprehensive internal Occupational Health and Safety (OHS) Management System that aligns with global standards and best industry practice. Our approach includes:

- An overarching Occupational Safety and Health (OSH) Policy
- Defined OSH goals, targets, and reporting frameworks.

- A structured OSH Plan with periodic performance assessments
- Compliance with key national and international regulations

Metrics & Targets

Our Roadmap to Net Zero Emission

Further to our belief that everyone deserves the benefits of a modern connected life, we are committed to contributing to the reduction of GHG emissions for a healthier planet. We aim for Net-Zero emissions by 2040 for Scopes 1, 2, and 3 emissions across all our operations.

To propel our commitment, we launched the Project Zero initiative in 2021 with a target to reduce our GHG emissions by 50% come 2030, using our 2021 emission levels as the baseline. Our baseline was rebased/recalculated due to updated Gas IPP Electricity emission factor from 110,095 tCO₂e to 113,826 tCO₂e.

Climate Action	Target
Reduce	Reduce energy use by improving efficiencies, optimising operations, and redesigning processes.
Substitute	Replace conventional, dirty energy sources with renewable technologies and low-emission products.
Compensate	Remove unavoidable residual emissions through Renewable Energy Credits and Offsets. This will be implemented once all available substitutes are exhausted.

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

Strategies

- Greening our energy supply by purchasing and investing in renewable energy projects.
- Reducing energy usage by improving energy efficiency.
- Investing in climate-resilient networks.
- Engaging with our suppliers to reduce their greenhouse gas emissions.
- Partnering with suppliers to deploy technologies to reduce energy use and emissions.
- Adopting better life cycle management practices and extending the life of our products.
- Collaborating with others to accelerate the transition to a low-carbon economy.

Our GHG emission strategy includes reducing our reliance on ozone-depleting substances (ODS) by implementing environmentally friendly refrigerants and phasing out high-impact greenhouse gases. In 2024, our recorded ODS emissions amounted to 7,700.2 tCO₂e, primarily from refrigerants used in cooling infrastructure.

Additionally, MTN Nigeria acknowledges the significance of monitoring air emissions, including Nitrogen Oxides (NO_x), Sulfur Oxides (SO_x), Persistent Organic Pollutants (POP), Volatile Organic Compounds (VOC), Hazardous Air Pollutants (HAP), and Particulate Matter (PM). However, as of the 2024 reporting period, specific data on these emissions was unavailable. Emission tracking primarily relies on energy consumption data collation from diesel, petrol, and electricity consumption measurements.

GHG Emissions By Source

Scope 1&2 Emissions

GHG Emissions By Facility/Activity

Target Annual GHG Emissions and Actual Scope 1 and 2 GHG Emissions (tCO₂e)

Scope 1 & 2 emissions (tCO ₂ e)	2021*	2022	2023	2024
Scope 1 emissions (tCO ₂ e)	65,899	55,698	58,356	55,066
Scope 2 emissions (tCO ₂ e)	47,927	26,835	40,361	46,234
Scope 1 & 2 emissions (tCO ₂ e)	113,826	82,533	98,716	101,300
Baseline	113,826	113,826	113,826	113,826
Targets	-	106,242	101,838	96,333
Targets vs Baseline	-	93.3%	89.5%	84.6%
Actuals	-	82,533	98,716	101,300
Targeted reduction per year	-	-6.7%	-10.5%	-15.4%
% reduction (actuals vs baseline)**	-	-27.5%	-13.3%	-11.0%
Difference	-	-20.8%	-2.7%	4.4%
% reduction (actuals vs target)**	-	-22.3%	-3.1%	5.2%
YoY emissions change	-	-27.5%	19.6%	2.6%

*2021 was used as the baseline. The baseline was rebased/recalculated due to the updated Gas IPP Electricity emission factor.

**Despite achieving an 11.0% reduction in Scope 1 and 2 emissions in 2024 compared to the 2021 baseline, actual emissions increased by 5.2% in 2024 compared to the target emission set for the year. While our overall Project Zero journey is still progressive, the trend of having higher annual actual emissions than the target needs to be managed by increasing our use of renewable energy, leveraging gas-powered IPP electricity, and reducing our reliance on diesel to power our operations.

Scope 3 emissions (tCO ₂ e)	2023	2024
Actuals	1,091,393	295,402
YoY emission change	-	72.9%
The 72.9% decrease in emissions is primarily attributed to the transition from the 2002 EEIO emission factor to the 2018 EEIO emission factor. This change particularly impacted capital goods, investments, and purchased goods and services. Additionally, the lack of available emission factors necessary to quantify emissions in Categories 11 and 12 contributed to the reduction.		

Energy Management

Energy is a critical component of our operations, powering our base stations, data centres, office buildings and vehicles. Reliable energy supply is essential for maintaining service quality and operational efficiency. In 2024, our total energy consumption was 1,004,650.5 gigajoules, sourced from diesel, petrol, electricity, and gas IPP. Most of our energy consumption occurred at our data centres, with purchased power being the primary energy source.

To improve energy efficiency, we deployed high-efficiency cooling units at data centres and introduced generator-battery hybrid solutions at BTS sites. These initiatives yielded 4,686.1 gigajoules savings on diesel consumption and total cost savings of N395.6 million.

Additionally, our Gas IPP project, implemented from 2018 to 2021, resulted in substantial savings of N9.8 billion in 2024. These efforts demonstrate our commitment to reducing energy consumption, lowering costs, and promoting sustainability.

Nigeria PachiPanda Challenge

As part of our commitment to climate entrepreneurship and protecting the planet, we joined other operating countries in the MTN Group for the Africa PachiPanda Challenge. This was in collaboration with the Worldwide Fund for Nature (WWF) and its local partner, the Nigeria Conservation Foundation (NCF). This initiative empowered young people to develop innovative, long-term solutions to Nigeria's pressing environmental challenges, focusing on four key areas: Plastic Pollution, Climate Change, Circular Economy, and Community Development.

The challenge received an overwhelming 1,643 entries, which were carefully evaluated and narrowed down to the top 100 and then to the top 10 finalists. The first, second, and third-place winners were selected and awarded cash prizes to implement their initiatives and drive positive change in their communities. The Nigeria PachiPanda Challenge is more than just a competition, it's a catalyst for environmental resilience and social impact. By fostering creativity, collaboration, and innovation, we are shaping the future of communities and the planet. The winners proceeded to represent Nigeria in South Africa at the Africa PachiPanda Finale, competing for the overall African winners' title with participants from Nigeria, South Africa, Zambia and Cameroon. Olabisi Rafatu Emmanuel from Nigeria emerged as the overall second-place winner.

Through this initiative, we are inspiring a new generation of changemakers to design practical, scalable, and sustainable solutions that promote environmental stewardship and community development.

Water Management

Given the nature of our operations, water usage is not intensive. At our offices, water, with a minimum quality standard at PH level range of 6.5 to 8.5, is used for sundry activities such as drinking, cleaning, fire hydrant medium, fire sprinkler medium, landscaping, and cleaning. Our water sources include groundwater (borehole, well water); municipal or public water (government or 3rd-party) and potable water vendors (drinking water, dispensers, and bottled water). Although our operations do not require intensive water usage, efficient water use is part of our environmental sustainability commitment, and we are adopting innovative measures to ensure good stewardship of this critical resource for immediate benefit and, most importantly, for the future.

Our water-saving strategies include installing sensor taps and low-flush toilets. We also commenced water use measurement and management initiatives across all our sites, using water flow meters and water bottle calibration for dispenser water. As part of Project GreenCycle (our water & waste management initiative), we carried out periodic awareness campaigns for all staff to drive behavioural change in water management. From closely monitoring our daily consumption and usage to water-saving strategies, we aim to contribute to the sustainable management of this critical resource. We do not withdraw water from areas with water stress.

Our effluent is discharged responsibly, adhering to local authority requirements at our various office locations.

Our Water Footprint

Metric	Quantity (Megalitres)
Quantity of water withdrawn from the ground	99.16%
Quantity of water withdrawn from municipal water (Government provided)	0.16%
Quantity of potable water (drinking water, dispensers, bottled water)	0.68%
Total quantity of water consumed	4701.0

Wastewater generated from the kitchenettes and conveniences in our offices and other facilities goes through defatting before disposal. Sewage at our high-rise facility is treated through an effluent treatment plant to meet the minimum standard level of 6.5 pH to 8.5 pH determined through treatment and sample tests at a laboratory authorised by the Lagos State Wastewater Management Authority before discharge. In low-rise facilities, sewage disposal is managed by third-party sewage management vendors.

Case Study

Eco-Friendly Sims

In October 2024, we launched our paper-based eco-friendly SIM cards, marking a significant milestone in our journey towards achieving net zero emissions by 2040. This initiative represents an important step in our efforts to reduce greenhouse gas emissions and enhance sustainability across all facets of our operations.

Our eco-friendly SIM cards are specifically designed to minimise waste and lessen environmental impact. They are recyclable, which helps reduce pollution and further decreases their ecological footprint. The production and disposal of these cards result in a lower carbon footprint, effectively helping to address the pressing challenges posed by traditional plastic SIM cards.

We collaborated with SecureID Limited, a local supplier, to achieve this feat, empowering local businesses and fostering sustainable growth. This initiative reinforces our commitment to sustainability and localisation highlighting MTN's dedication to positively impacting the environment and the communities we serve.

Responsible Resource Stewardship - Waste Management

At MTN Nigeria, waste management is guided by our Waste Management Policy and Electronic Waste Management Policy, which focus on minimising waste generation, maximising recycling and reuse, and ensuring responsible disposal in partnership with the relevant waste management authorities.

Our operations generate various waste types, including general/domestic waste, organic/food waste, paper, plastic, metal, glass, scrap batteries, tyres, and electronic waste (e-waste). To enhance waste management, we introduced colour-coded waste segregation bins in open-plan offices and external areas in Lagos, along with digital weighing scales to measure waste at collection points and disposal sites, all part of our Project Green Cycle Initiative.

In 2024, we generated 307.8 tonnes of waste, with 96.1% classified as domestic waste. Through our recycling initiatives, 8.42% of total waste was successfully diverted from the landfill, reinforcing our commitment to a circular economy and environmental sustainability.

Going Digital in our y'elloverse

Through the successful digitisation of our boardroom and meeting spaces, we have created smart, hybrid-enabled work environments that support remote collaboration while reducing the need for physical meetings. This shift has contributed to lower travel-related emissions and a more sustainable workplace.

A key achievement in 2024 was the increased adoption of Adobe Sign, which has significantly streamlined our document management process. Over the year, MTN Nigeria executed approximately 9,826 unique transactions, covering 96,891 pages, and eliminated the need for 33,362 physical signatures. This initiative has enhanced operational efficiency while supporting our paperless and carbon-reduction goals.

This digital transformation has resulted in substantial cost savings and environmental benefits, including:

- 388,245 pages of A4 paper saved from printing (equivalent to about 47 trees)
- Cost savings of approximately N133.5 million on printing, paper, and man-hours

Case Study

Early Warning Systems

MTN Nigeria, Tomorrow.io and the Nigerian Meteorological Agency (NiMet) signed a tripartite Memorandum of Understanding (MOU) for the pilot phase of the Digital Climate Advisory Services (DCAS) System. The project which is in line with the United Nations (UN) goal of ensuring early warning systems for all, is aimed at strengthening climate resilience in Nigeria, which will consequently be beneficial to the agricultural sector, leading to improved productivity amongst farmers.

The DCAS system will deliver location-specific, actionable weather advisories to Nigerian farmers via mobile SMS. This is an innovative solution that will not only affect the agricultural sector but also has the ability to ripple across Nigeria's economy. MTN Nigeria remains committed to contributing to national development through strategic partnerships and technology-driven initiatives that empower communities and support long-term growth.

Doing for People

Cultural & Social Pillars

- Introduction
- Our Sustainability Context
- Governance
- Strategy
- Risk Management
- Metrics & Targets
- Appendix

At MTN Nigeria, people are at the heart of everything we do. Guided by our belief that everyone deserves the benefits of a modern connected life, no matter where they live or what their background may be, we are committed to empowering our teams, strengthening organisational agility, and optimising processes to build a business that works, not just for us, but for the communities we serve. In a world driven by rapid digital transformation, connectivity is essential to prevent exclusion. As leaders in this field, we are taking decisive action to bridge the accessibility gap..

Through initiatives that promote digital and financial inclusion, skills development, and diverse representation, we are working to create a more inclusive society. Our success is driven by the passion and expertise of our **Yello** family, whom we refer to as MTNers. Their dedication fuels the innovation and impact we have achieved and are still striving for every day.

Our Corporate Social Investment (CSI) initiatives, led by the MTN Foundation, are designed to uplift communities, foster sustainable growth, and ensure that our progress as a company remains connected to the well-being of the people we serve.

We are ‘Doing for People’ by:

We asked our CHRO...

What new initiatives were introduced in 2024 to foster employee development, focusing on skills enhancement relevant to the digital economy and future of work, and how have these initiatives impacted employee retention and promotion rates?

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

In 2024, MTN Nigeria significantly expanded its employee development programmes to align with the evolving demands of the digital economy. A key initiative in line with the 'Grow with Purpose' pillar of our Employee Value Proposition was the launch of the Career Growth Maps Learning Journey, a comprehensive eLearning suite designed to equip employees with core functional skills critical for success in a rapidly changing digital landscape. This programme focuses on Artificial Intelligence, Cloud Technologies, Customer Value Management, and Digital and Software Engineering, ensuring our workforce is future-ready.

To deepen AI literacy, we also introduced AI appreciation workshops in 2024, starting with the leadership team and board members. These sessions will be extended to all employees in Q1 2025, fostering AI adoption to enhance productivity, innovation, and process optimisation. Additionally, over 200 employees participated in data science and analytics training, reinforcing our commitment to building a data-driven organisation.

We reintroduced the Future Ready Skills programme, which strengthens employees' digital, cognitive, and social capabilities. This initiative promotes the development of soft and behavioural skills, including cultural awareness, emotional intelligence, leadership, critical thinking, and innovation thus preparing our employees for the demands of the future.

Nigeria, like many developing nations, faces the challenge of skilled professionals emigrating in search of better career and economic opportunities – a phenomenon widely known as the 'japa' syndrome. This trend has posed a significant talent retention challenge across industries. However, MTN Nigeria's strategic focus on internal growth and employee retention has yielded positive outcomes. In 2024, our internal promotion rate increased to 45%, up from 39% in 2023. Simultaneously, our year-on-year attrition rate decreased from 4.1% in 2023 to 2.4% in 2024, demonstrating our commitment to career advancement and employee satisfaction.

Looking ahead, we remain focused and committed to building on our achievements through continued investments in employee development covering functional, behavioural, and leadership development, alongside targeted future-fit capability building. Our goal, as we transition to a full technology company, is to continue fostering a culture of continuous learning and innovation, ensuring our people are equipped for success in the digital era.

Esther Akinnukawe
Chief Human Resources Officer (CHRO)

Expanding Inclusive Connectivity

Expanding mobile network access and accelerating connectivity is a core commitment for MTN Nigeria. To achieve our strategic ambition of reaching 50 - 60 million active data subscribers by 2025, we are focused on providing affordable and tailored connectivity solutions. Our CHASE framework, launched in 2018, is instrumental in overcoming the five key barriers to mobile internet adoption: coverage, handsets, affordability, service bundling, and education/ease of access, particularly in the communities we serve.

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

CHASE	2024 Achievements
 Coverage	We expanded our 2G, 3G, 4G and 5G network coverage to reach 93.0% (2023: 92.9%), 86.7% (2023: 82.4%), 82.4% (2023: 81.5%) and 12.7% (2023: 11.3%) of the population, respectively. We also expanded rural coverage through our rural telephony initiative, providing coverage to more than 64.4 million people in over 3,067 communities nationwide.
 Handsets	By deepening our partnership with original equipment manufacturers (OEMs) and expanding device financing options, we increased our smartphone base by almost 3 million. Of this total, 128,200 were financed, and almost 1 million were 5G smartphones.
 Affordability	We have made data more affordable and reduced the barriers to entry for first-time data users. With the launch of Facebook Auto-Flex, we onboarded an additional 591,000 customers to the internet through the free daily data allocation for first-time data users. Additionally, through the data transfer service, with 5GB being the maximum transferable volume, data usage for beneficiaries was sustained to the extent of converting new Active Data Users of about 32,000 in the year.
 Service Bundling	Leveraging artificial intelligence (AI) enabled systems, we developed relevant, straightforward, and meaningful offerings for our customers through service bundling. In partnership with YouTube, we onboarded 38,628 customers to the YouTube streaming service.
 Education and Ease of Access	In order to promote digital literacy, we implemented targeted data usage training programmes and improved data access. In 2023, we launched two campaigns to encourage the use of digital services and promote digital literacy: • We utilised content marketing, creating awareness through YouTube content that benefits customers' lifestyles. • We also launched a 'How To' video to educate customers on updating their 5G device operating system (OS).

From our rural telephony initiatives that connect underserved communities to the digital world to expanding financing options for handsets while providing affordable data and advancing digital literacy and connectivity, we are positioned to drive inclusive connectivity at MTN Nigeria.

By the end of 2023, the number of people using mobile internet increased to 4.6 billion, representing 57% of the global population ([The State of Mobile Internet Connectivity 2024, GSMA](#)). In 2024, we further expanded coverage to underserved and remote communities, bringing mobile connectivity to 80.9 million customers, up 1.5% from our 2023 coverage. Our progress towards our Ambition 2025 target of 95% coverage stands at an impressive 90.1%.

e-SIM Adoption

MTN Nigeria continues to lead the adoption of Embedded Subscriber Identity Module (e-SIM) technology, enhancing customer convenience, digital inclusion, and connectivity while supporting Nigeria’s growing digital economy. By eliminating the need for physical SIM cards, e-SIM technology allows multiple profiles on a single device, enabling seamless activation and the use of mobile services across smartphones, wearables, and other devices.

Since its introduction in August 2020, e-SIM adoption has grown significantly. In 2024, e-SIM sales surged by 129.3%, with 153,430 new subscribers, bringing the total number of customers using e-SIMs to 238,528. This rapid adoption highlights MTN Nigeria’s commitment to cutting-edge innovation, offering unmatched flexibility and next-generation connectivity solutions to empower individuals and businesses across Nigeria.

Fostering Financial Inclusion for All

MoMo Payment Service Bank (MoMo PSB) is breaking down financial inclusion barriers by providing accessible, affordable, and secure end-to-end solutions. We are building Nigeria's leading Fintech platform, ensuring compliance with the Central Bank's regulations to serve a wider population and drive economic growth. Our goal is to achieve 30 - 40 million active MoMo wallets by 2025. Currently, MoMo offers wallet, bank tech, e-commerce, and remittance services, facilitated through USSD, a robust agent network, and the MoMo app, serving 2.8 million active wallets and 75,783 agents. We are committed to developing solutions that meet Nigerian needs, leveraging partnerships and certifications like the GSMA Mobile Money Certification to solidify MoMo PSB's position as a trusted financial provider.

The Heart of Y'ello

At MTN Nigeria, our **Y'ello** family is the driving force behind our success – turning ideas into impact. We are committed to fostering an environment where our people feel empowered, learning and development is continuous, and inclusivity enables individuals from all backgrounds to create meaningful solutions.

As an employer of choice, we attract and retain top talent through strong branding, industry visibility, and corporate values rooted in sustainability, diversity, inclusion, equity, and innovation. Our recruitment strategy is diverse, leveraging job boards, career fairs, referral programmes, and partnerships with professional associations, while utilising technology to ensure an unbiased selection process.

In 2024, 64.4% of new hires were women, increasing female representation among full-time employees to 41.4%, a notable rise from the previous year. Our employee turnover rate was 5.7%, reflecting strong engagement and retention. Additionally, we uphold strict policies against child labour and modern slavery, conducting due diligence across our supply chains to prevent any indirect involvement in these practices. Our **Y'ello** family spreads across all the regions in Nigeria and generations presented below:

Driving Inclusion and Celebrating Diversity

At MTN Nigeria, Diversity, Equity, and Inclusion (DEI) are integral to our identity and operations. Guided by our DEI Policy, we are committed to fostering an inclusive, equitable, and safe workplace where every employee is treated with dignity, respect, and fairness. Reviewed in October 2024, this policy reflects our belief that our strength lies in the diverse backgrounds, perspectives, and talent of our people. We are intentional about creating an environment where everyone feels valued and experiences true belonging.

As part of our commitment to local workforce development, 97.3% of senior management positions (totalling 184 hires) are occupied by employees from the local community in our operational locations. This approach aligns with our diversity and inclusion goals and reinforces our dedication to empowering local talent while driving sustainable growth.

Gender Equality

On the journey to achieving 50% female representation, we have focused on fostering a diverse and more inclusive work environment. A critical element for us is empowering our people to build confidence for career advancement. One such way is through our Employee Resource Groups. The 'WAY' (Women at **Yello**) and 'MAY' (Men at **Yello**) are structured networks to support our employees to achieve their professional goals.

The WAY supports female empowerment through the 'STEM by WAY' legacy scheme, which raises funds to support women in Nigerian public tertiary institutions. This scholarship initiative, fully funded by the WAY, has successfully raised N8.4 million (US\$ 5,138) since inception.

Other programmes were held to promote gender equality and celebrate our Tech amazons in the **Yello**verse. These aim to foster a future where women lead in technology, shape the digital landscape, and create a diverse and impactful environment.

Women At Y'ello - WAY programmes and activities in 2024

- MTN Nigeria's women-focused network, the WAY, celebrated its sixth anniversary with a powerful event addressing the theme "Lead the WAY". The Event left a powerful, inspiring message on the power of critical thinking, the courage to take bold steps, and the importance of overcoming obstacles to achieve success.
- Notably, MTN Nigeria launched "Pave the WAY", a mentorship programme to coach female employees from levels 1 to levels 3. This initiative is designed to build confidence and equip women with the skills and strategies needed to advance in their careers.
- On March 8, the WAY hosted a virtual event themed "#InspireInclusion" on the topic 'Investing in the progress and inclusion of women'. The event emphasised the need to invest in women to enhance economic value, hard work, and continuous upskilling.
- MTN Nigeria women participated in the MTN Group International Women's Day (IWD) celebration tagged 'Be the Change', featuring HeForShe Alliance conversations with leaders from MTN Nigeria, Ivory Coast, and South Africa with a pledge from MTN Nigeria to create a more inclusive and empowering environment for women in MTN.
- We hosted a Tech Series to support the growth and development of women in tech. The inaugural session, "The Rise of AI: Navigating the Future of Work," led by MTN Nigeria Leadership, explored AI's applications and impact on the future workforce. The series also featured:
 - Mentorship and sponsorship initiatives to foster guidance and support.
 - A thought-provoking discussion: "What Advice Would You Give Your Younger Self?"
- MTN Nigeria participated in the 2024 edition of the women's week hosted by MTN Group themed "Celebrating our Women."
- 24 MTN Nigeria women participated in the OPCO-wide 2023 Rising Leaders programme, an annual talent development plan to accelerate female development in the talent/critical pool and to increase female representation in succession pools. 17 teams were assigned the Group Action Learning Project. At the programme's close in 2024, a team of 7 Nigerians and 4 non-Nigerians emerged overall winner.

Men At Y'ello - MAY programmes and activities in 2024

Our February 14, 2024, event themed ‘Dare to be Counted’, addressed Gender-Based Violence (GBV). The event aimed to raise awareness about the causes, recognition, prevention, and recovery from GBV. It encouraged employees to become advocates for the cause, emphasising the importance of fostering a culture free from gender-based violence.

To commemorate International Men’s Day, we hosted an event with the theme ‘Authentic Men. Authentic Lives’ to promote positive male role models. It focused on authentic, empathetic, and responsible masculinity, with an emphasis on embracing vulnerability, self-awareness, and integrity. The event aimed to inspire men to foster healthier relationships and build stronger communities by embracing these qualities.

We acknowledge the changing dynamics of work and family life, and through MAY, we promote work-life integration, mental health support, and leadership development for men. By fostering an inclusive culture, we encourage men to be allies in promoting equality while thriving in their personal and professional journeys.

Gender Equality (contd.)

As we continue our journey towards achieving 50% women's representation by 2030, we are pleased to report that in 2024, we reached 41.4% women's representation, surpassing our 2024 target by 1.6 percentage points. This marks a 2.7 percentage point improvement from our 2023 achievement.

Additionally, our workforce remains diverse, with a healthy balance across various age groups and the six geopolitical zones in Nigeria. This diversity strengthens our ability to connect with and understand our varied customer base, fostering a more innovative and resilient organisation that mirrors the diversity of the communities we serve.

In recognition of our gender inclusion efforts, we were honoured to receive the EDGE Move (Economic Dividends for Gender Equality) Certification from the EDGE Certified Foundation following advisory support from International Finance Corporation (IFC) in 2024. As the first TechCo in Africa to earn this prestigious certification, it reflects the tangible impact of our gender inclusion initiatives and highlights the significant progress we have made as an organisation. As the first TechCo in Africa to earn this prestigious certification, it reflects the tangible impact of our gender inclusion initiatives and highlights the significant progress we have made as an organisation.

Fair Wages and Employment

At MTN Nigeria, the entry-level wage is set well above the national minimum wage, ensuring fair and competi-

five compensation for all employees. As of December 31 2024, the ratio of the entry-level wage to the local minimum wage stands at 6.4:1. This ratio is consistent across both genders, demonstrating the company's commitment to equity pay and inclusive remuneration practices. To uphold wage competitiveness, we conduct annual remuneration benchmarking through a professional survey provider, ensuring alignment with industry standards and best practice in fair compensation.

Creating Space for All Abilities
(Supporting Persons With Disabilities)

At MTN Nigeria, we are committed to creating a workplace where all abilities are celebrated and everyone

feels valued. Beyond our organisation, we actively promote inclusion within the larger society, leaving no one behind. Our commitment is reflected in both our internal diversity and inclusion policies and the impactful initiatives of the MTN Foundation in the communities we serve.

To better understand and support employees with disabilities, we deployed an Inclusivity Survey (based on the Washington Group of Enhanced Questions) to identify special needs and tailor our support accordingly. This survey will also be integrated into our onboarding process for new hires.

As part of our ongoing initiatives, we significantly increased support for employees with disabilities. In 2024, hearing-impaired employees received a 600% increase in hearing aid coverage, ensuring greater enablement and workplace accessibility.

Currently, MTN Nigeria employs 41 individuals with disabilities across various categories, including sensory

Breakdown of Employees with Disabilities

Disability Type	Male	Female	Grand Total
Sensory (visually or hearing impaired)	4	12	16
Sensory & physically impaired	1	2	3
Mobility impaired	14	6	20
Mental or intellectual impaired (mild)	0	2	2
Total	19	22	41

impairments, mobility limitations, and intellectual disabilities. This representation underscores our commitment to building an inclusive and accessible workplace, empowering individuals of all abilities to thrive.

To ensure workplace safety and accessibility across our operations, safety and bus marshals support colleagues living with disabilities in various activities. Safety marshals follow established guidelines to assist employees with disabilities during fire drills and emergency evacuations. A successful pilot drill was conducted across select locations, with plans to enhance the process for future exercises. Similarly, Staff Bus Marshals are trained to support employees with disabilities during onboarding and offboarding, ensuring their safety and convenience.

As part of our dedication to ensuring accessibility for customers with disabilities, we introduced a feature that allows customers to identify their disability type, enabling targeted support and reasonable adjustments. Additionally, we developed guidelines to provide sign language interpretation during all major external events, ensuring accessibility for stakeholders.

MTN Nigeria actively collaborates with industry bodies and organisations to advance disability inclusion. We are members of the Nigeria Business Disability Network (NBDN) - a network of businesses that promote disability-friendly workforce practice. In 2024, we participated in the second edition of the Nigerian Diversity & Inclusion conference, where we received an

award for excellence in support for PWDs. We also participated in the national validation workshop organised by SightSavers for the private sector on the “Access to Work Scheme” - a national initiative designed to incentivise employers to recruit persons with disabilities.

We maintain our strategic partnerships with the National Commission for Persons with Disabilities, Accestech Innovation and Research Centre, and the International Finance Corporation (IFC) for ongoing advisory support on workplace inclusion and gender equality. Through our partnership with SightSavers, our employees volunteered as mentors in a six-month mentorship programme to help PWDs develop skills for employment.

MTN Nigeria aided the IT Bridge Academy, offering entry-level IT training to PWDs aged 18 – 35 years. Two senior employees served on the Advisory Board Committee while seven served as facilitators. Upon completion of the programme, four graduates were offered one-year internship opportunities in our IT division.

Workplace Efficiency, Support and Compensation

Introduction

At MTN Nigeria, we are dedicated to fostering a dynamic and rewarding workplace that values both cultural enrichment and professional growth. Recognising the critical role of effective communication, **Yello** Hive app, a central hub for all company-related information that enhances collaboration and simplifies information sharing was launched and integrated across the Group. This platform has significantly transformed employee interaction and collaboration, streamlining communication and enhancing teamwork across our organisation.

As a leading technology company in Nigeria, we prioritise equitable and competitive compensation packages. We believe these efforts, coupled with unique offerings, contribute to a strong sense of commitment and engagement, evidenced by our impressive average employee tenure of nine years. Our remuneration policies are meticulously designed to ensure fair compensation and a direct correlation between pay, job satisfaction, and a positive work environment. These policies are the result of annual remuneration benchmarking, peer assessments, and consultation with independent remuneration consultants. We are also deeply committed to equitable pay and fairness, continuously monitoring and addressing any identified disparities within our organisation.

Currently, our women-to-men salary ratio is 1:1.09, and the ratio across levels is shown below:

Level	Ratio (Women:Men)
L1	1.1:1
L2	1.08:1
L3	1:1
L3H	0.97:1
L4	1.04:1
L5	1:1

In 2024, recognising the challenging economic conditions, the Board approved a Cost-of-Living Adjustment (COLA) award for Full-Term Employees (FTEs) to safeguard their financial stability. Our comprehensive compensation programme extends beyond monetary rewards. We offer FTEs access to medical cover, group pension benefits (including voluntary contributions for reduced tax liability), lifestyle benefits, and group life assurance to support their families. Furthermore, our early retirement policy allows employees aged 50 to 59 to opt for retirement with a corresponding compensation package, providing flexibility in their career transitions.

Prioritising employee well-being, we significantly enhanced our wellness initiatives in 2024. This included Personal Health Assessments and revamping our office gym to foster a culture of wellness. Recognising the importance of home ownership for financial stability, we partnered with the Federal Mortgage Bank of Nigeria (FMBN) to facilitate home ownership sessions, with a

substantial number of employees demonstrating interest and pursuing the necessary steps to become homeowners.

We are committed to supporting our employees in balancing their professional and personal lives. To this end, we offer flexible work arrangements, comprehensive mental health support, and generous parental leave policies. Our leave policy includes up to six-months of maternity leave and up to ten-days of paternity leave. In 2024, 105 employees availed themselves of parental leave, with nearly all (67 males and 38 females) returning to work, demonstrating our commitment to supporting working parents. Additionally, our on-site MTN Creche provides childcare services, further aiding the work-life balance of our employees.

Advancing a Respectful and Harassment-Free Workplace

At MTN Nigeria, we have zero tolerance for workplace harassment, discrimination, and unfair treatment based on health status, ethnicity, disability, gender, or any other differences. Our Workplace Harassment Policy explicitly prohibits such behaviour, and our Speak-Up framework provides confidential channels for reporting incidents, ensuring employees can speak out without fear of retaliation. There were no incidents recorded in 2024, underscoring our commitment to fostering a respectful and inclusive work environment. Additionally, our employees enjoy full support in exercising their rights to freedom of association and collective bargaining.

Advancing Skills and Knowledge

We acknowledge that continuous learning and skill development are fundamental to the innovation and long-term success of our organisation. Hence, training our **Y'ello** family is part of our culture, and we strive to create the right environment and provide access to tools for learning and development in our rapidly changing digital world.

Every year, our internal training plan is tailored to build capabilities across the workforce, ensuring equal opportunities for all job levels to be trained and upskilled. In 2024, our curriculum focused on acculturation, diversity and inclusion, leadership, and workplace safety, targeting identified competency gaps in functional, technical, and behavioural skills. Through the ULearn platform, (with over 4,200 mandatory and voluntary learning activities), we achieved over 98% employee participation in business-led learning initiatives. Additionally, we launched our first Manager's

Employee Training	Number of Employees Trained
ESG/Sustainability related Trainings	383
Information security training	1668
Ethics training	66
Digital Rights attestation	290

Café (for employee on grade level 3) to inspire leaders to continuously improve and drive excellence within their teams.

In 2024, we conducted quarterly performance check-in reviews with 99% employee participation, excluding 14 employees who were on study leave, career break, or maternity leave. Demonstrating our commitment to continuous learning and development, we invested N2.62 billion in training programmes. This investment included N12.1 million in sustainability training, N15 million in Occupational Health and Safety training, with the remaining funds supporting a variety of specialised programmes to meet the diverse needs of our organisation.

Occupational Health and Safety

We prioritise our commitment to the occupational health and safety (OHS) of our employees, contractors and all stakeholders to minimise occupational risks and

comply with relevant health and safety regulations, including:

- National Policy on Occupational Safety and Health 2020
- Factories Act CAP F1 LFN 2004.
- ILO OSH Convention, C155, 1981 and its protocol of 2002
- Fire Service Regulations 2019
- ISO 45001:2018 Occupational Safety and Health Management
- Employees' Compensation Act, 2010
- Lagos State Safety Commission Law, 2011
- Nigeria Labour Law 2004
- Nigerian Highway Code 2013

We recognise that a safe and healthy workplace is fundamental, and we have developed the OHS policies listed below:

- Manage and Monitor Policy
- Safety Processes and Procedures
- Safety Manual
- Guidelines for Hotel Accommodation, Water and Food Vendor Management
- Occupational Health Policy
- Safety, Health, and Environment Policy
- Emergency Response and Preparedness Policy
- Alcohol and Drug Policy
- No Smoking Policy
- Journey Management Policy - Air, Land and Sea Travel
- Seat Belt Policy
- Safety, Health and Environment (SHE) Contracting and Contractor Management Policy
- Safety, Health and Environment (SHE) Access Policy

Mandatory Learning Activities Completed

- ✓ Live **Y'ello** Values Workshop
- ✓ MTNN Workplace Harassment Policy Attestation
- ✓ MTNN Digital Rights Policy Attestation
- ✓ MTN Data Privacy
- ✓ Information Security Mandatory Learning Courses (Passwords, Ransomware, Deep Fakes , Secure your device)

Occupational health and safety is embedded in our continuous improvement culture, reflection our dedication. We set clear OSH objectives and targets, supported by comprehensive plans, programmes, and procedures, and continuously gather feedback through our OSH review loop and internal management system. This ensures we meet or exceed safety regulations and industry best practices.

We proactively identify hazards through regular facility and equipment inspections and engage both employees and contractors in risk assessments. Contractors must submit a competence certificate and complete safety inductions before starting work. Our comprehensive safety management system includes certified safety personnel, dedicated budgets, clear safety targets, Personal Protective Equipment (PPE) provisions, firefighting equipment, and regular training sessions.

Employee engagement is critical to our approach; we conduct periodic safety surveys, hold regular management meetings, and perform safety tours across our sites. In 2024, we enhanced our safety culture through facility audits, weekly inspections, fire evacuation drills, incident marshal training, hotel audits, equipment checks, safety roadshows, and awareness campaigns. We also commemorate global safety events and encourage incident reporting via multiple channels, including our online ServiceNow platform, phone, email, and WhatsApp underpinned by policies that protect whistleblowers.

Our diverse safety committee and stakeholder forums, such as the National Transport Safety Stakeholders Review Forum and the Regional Transport Incident Review Panel, drive our health and safety initiatives. When incidents occur, our Incident

Management Team conduct thorough investigations using the 5Ys method Root Cause Analysis, implements corrective actions, and shares learning to prevent recurrence.

To instill a culture of safety, we deliver ongoing virtual and in-person training on occupational safety, emergency preparedness, and safe work practices. In 2024, over 600 employees participated in safety training, representing more than 50% of our workforce. As a testament to our efforts, MTN Nigeria was honoured with the AfriSAFE Telecommunications Company of the Year for Safety Excellence award. We remain dedicated to fostering a

Type of Incident	Number of Incidents	
Non-compliance with health & safety regulations	None	
Fatalities as a result of work-related injury	Zero	
High consequence work-related injuries (excluding fatalities)	FTE	None FTE
	Zero	Two
Work-related injuries	Five (Four Males, One Female)	
Fatalities as a result of work-related injury	Zero	
Work-related injuries recorded for non-FTE	Two	
Was any worker(s) excluded from the record above	No	

We work to create a great working environment, providing productivity tools and investing in our employee’s wellbeing and professional development.

Additionally, our workforce extends beyond direct employees to include contracting and consulting staff, whose work is controlled by the organisation. These workers play a vital role in our operations, contributing across various functions. In 2024, we recorded zero fatalities among our FTE and non-FTE workforce, with only two high-consequence work-related injuries and five recordable work-related injuries. We remain committed to providing a safe and healthy workplace for all individuals contributing to our operations, including those engaged through external contractual arrangements.

y'ello Care

MTN Nigeria's annual **y'ello Care** campaign is our flagship volunteerism programme, empowering employees to drive positive change in their communities and extend our impact beyond telecom services.

In 2024, **y'ello Care** focused on "Education for Rural and Remote Communities" and as part of MTN Group's 30th anniversary, we ran the campaign for 30 days from June 1 to 30. A key initiative was the renovation of classroom facilities at Iwerekun Community High School in Lakowe, Ibeju Lekki, Lagos, which provided a safer and more conducive learning environment for 996 Senior Secondary School students. During the campaign, 505 employees volunteered a total of 1,104.3 hours, sharing their expertise and time to make a lasting impact.

Our volunteers delivered targeted educational workshops and training sessions for both students and teachers. Vocational skills workshops in bead-making, soap-making, and painting complemented academic learning with practical skills. Leadership engagement was strong, with 6 executive team members, 8 General Managers, and 36 Senior Managers each dedicating around 2 hours to coordinating events. Strategic

Before

After

The 2024 **Y'ello** Care campaign addressed critical barriers to education in rural areas by:

- Introduction
- Our Sustainability Context
- Governance
- Strategy
- Risk Management
- Metrics & Targets
- Appendix
1. Improving Infrastructure: Renovating classrooms at Iwerekun Community High School to enhance the learning environment.

2. Providing Essential Resources: Supplying textbooks and school supplies to schools in remote communities in Enugu, Abuja, Kano, and Oyo states, to enhance the quality of education.

3. Raising Awareness: Collaborating with organisations such as the Safe School Response Coordination Centre and Knosk N100 a Day School to spotlight challenges in rural education.

4. Amplifying the Message: Showcasing our efforts through media platforms to inspire further action toward improving education in underserved regions.

Through **Y'ello** Care, MTN Nigeria reiterates its commitment to community empowerment and sustainable development in education. Beyond these immediate impact, the campaign has fostered sustainable change by uplifting individual families and communities, creating lasting, positive ripple effect.

Y'ello Hive

MTN Group launched the **Y'ello** Hive App, a highly intuitive, engaging platform designed to streamline communication and foster a sense of community among employees. The app serves as a central hub for all company-related information, enhancing collaboration and simplifying information sharing.

The **Y'ello** Hive App improves seamless communication by offering access to a variety of learning resources, facilitating feedback and surveys, while integrating with other systems. It also supports sustainability initiatives by reducing communication gaps and promoting collective engagement. This innovative platform is transforming the future of work at MTN, driving efficiency and strengthening our organisational culture.

y'ello Mums

Introduction

In 2024, we launched the **y'ello** Mums One-Year Internship Programme, an initiative designed to empower career-focused mothers to re-enter the workforce after taking a break from their careers due to personal or family reasons. This programme aligns with our core value of 'Act with Inclusion,' which strives to create a workplace where women can thrive, regardless of their marital or maternal status.

Our Sustainability Context

Governance

Strategy

Our goal is to demonstrate that motherhood and professional success can coexist harmoniously while fostering a supportive culture that enables employees to lead fulfilling lives with choice, control, and flexibility.

Empowering Communities

Introduction

At MTN Nigeria, our purpose goes beyond business alone. We believe that driving meaningful impact will empower and inspire long-lasting impact in the communities we serve. Through our Corporate Social Impact (CSI) initiatives championed by the MTN Foundation, we have led several initiatives and invested in health, economic empowerment, education, community sponsorship and other humanitarian support. Our CSI commitment stems from the MTN Group mandate to all operating companies to allocate 1% of profit after tax to fund Corporate Social Impact (CSI) initiatives.

Our Sustainability Context

Governance

In 2024, MTN Nigeria committed N3.5 billion to implement CSI initiatives, impacting over 663,300 individuals across several communities. We collaborated with communities on initiatives guided by our CSI strategy and in alignment with UN SDGs, UNGC, ISO 26000 on community involvement and development.

Our 2024 Corporate Social Investment (CSI) Activities

	Focus Area	Initiatives	Objectives	2024 Beneficiaries
Introduction	Health	“What Can We Do Together” Phase 5	The initiative aims to revitalise Primary Healthcare Centres (PHCs) across the 36 states and Abuja and foster grassroots community development through cooperative efforts in partnership with Nigerians and the Private Sector Health Alliance of Nigeria (PSHAN).	We completed 32 PHCs in 29 States. They were revitalised with alternative solar-powered solutions in maternal and delivery wards, solar-powered boreholes, medical equipment, consumables & drugs.
Our Sustainability Context				Since its inception, the initiative has successfully executed community-based projects in 586 communities across 482 Local Government Areas.
Governance		Anti-Substance Abuse Programme (ASAP)	The programme aims to increase awareness about the dangers of substance abuse and reduce the rate of first-time drug abuse among Nigerian youths aged 10 to 25.	26,822 students and 454 teachers from 55 public secondary schools in 12 States received a one-month prevention of drug and substance abuse education.
Strategy				Over 12 million people were reached by the Foundation's advocacy programmes.
Risk Management			The Foundation partnered with the National Drug Law Enforcement Agency (NDLEA), the United Nations Office on Drugs and Crime (UNODC), and the Federal Ministry of Education.	
Metrics & Targets		MTN Emergency Relief Clean Up Project (Project Clean)	The initiative aims to support communities devastated by flood and focuses on renovating and equipping Primary Healthcare Centres (PHCs). The initiative was implemented in partnership with Private Sector Health Alliance of Nigeria (PSHAN).	We renovated 12 PHCs across six states, equipped them with solar-powered boreholes and provided medical equipment, consumables and drugs.
Appendix	Education	MTN MUSON Music Scholars Programme	The programme offers fully funded scholarships to musically talented young individuals, enabling them to pursue a two-year diploma at MUSON School of Music.	In 2024, we awarded scholarships to 81 candidates.
				42 candidates (28 males and 14 females) commenced the 2024/2025 academic session (Year I), while 39 candidates were awarded scholarships into Year II.
				Since inception in 2006, 484 scholars have graduated from the programme.

Focus Area	Initiatives	Objectives	2024 Beneficiaries
Introduction Our Sustainability Context Governance Strategy Risk Management Metrics & Targets Appendix	Education (contd.)		
	MTN ICT Laboratory Project	The project aims to enhance information and communication technology education in public secondary schools across the nation. This initiative focuses on renovating and equipping secondary schools with state-of-the-art digital tools to enhance learning and teaching for students and teachers.	We renovated and upgraded the ICT laboratory at Oraifite Boys High School, Anambra State.
	MTNF Science & Technology Laboratory Project (Phase 3)	The project aims to enhance the teaching and learning of science subjects (Physics, Chemistry, Biology, and Agricultural science) in secondary schools in Nigeria while renovating nominated science laboratories in public secondary schools by equipping them with state-of-the-art equipment and consumables, and providing training for the science teachers and laboratory attendants.	In 2024, 29 laboratories were renovated in six public secondary schools in Lagos, Kano, Enugu, Gombe, Rivers and Plateau States.
			From inception, we have remodelled over 110 laboratories in 32 public secondary schools.
	MTN Scholarship	The scheme provides eligible Nigerian youths and students in public tertiary institutions (universities) with N300,000 in scholarship funding, enabling them to continue studying STEM at the tertiary level. We also provide a Blind scholarship scheme.	1,011 scholarships were awarded to high-performing STEM & Blind university scholars in 2024. To date, 14,728 scholarships have been awarded.
			300 new STEM scholars were onboarded, while 539 including the Top 10 UTME existing scholarship continued. For the blind scholarship, 100 new scholars were onboarded to join the 72 existing recipients of the scholarships.
			363 scholars participated in the one-day Skill Up! Workshop.
	Scholarship Internship Programme	The programme offers undergraduate scholars the opportunity to intern at MTN Nigeria and acquire experience while still in school.	14 scholars were recruited to intern in various units within the business: Six in IT, Four each in both Finance and Networks.
			The interns attended the 2024 MTN Yello preneur Pitch session as part of their learning experience.

Focus Area	Initiatives	Objectives	2024 Beneficiaries
Introduction Our Sustainability Context Governance Strategy Risk Management Metrics & Targets Appendix	Education (contd.)	Teachers Fellowship Programme The programme is aimed at empowering teachers with the skills necessary to leverage technology, innovative teaching and learning methods to transform education in public secondary schools across Nigeria. This Fellowship allows teachers to harness continuous professional development, empowering them to contribute towards inclusive, equitable education that will improve the learning outcomes of Nigerian students in the 21st century. It is implemented in partnership with SAIL Innovation Hub and Co-Creation Hub (CcHub).	4000 teachers were trained in a 4-week training session in the first phase.
			At the end of the second phase, 400 teachers across the country completed a 16-week training.
			The top graduating teachers received a laptop and MTN routers for internet connectivity.
	Economic Empowerment	Digital Skills for Digital Jobs (DSDJ) The initiative is designed to support African youths in acquiring relevant digital skills to find work and aid their businesses to succeed and grow. It comprises of learning off the MTN Skills Academy Platform and participation at Digital Skills Outreaches.	About 47,000 recipients across various digital communities were trained.
		MTN Skills Academy Platform The MTN Skills Academy Platform is a web-based upskilling platform for learning and career guidance.	Although the platform has not been officially launched in Nigeria, Nigerians have begun to benefit from the initiative.
			3,756 unique users signed up on the Platform.
			854 learners completed the Career Guidance Survey.
			1,650 learners enrolled for 5,117 Coursera starter courses and completed 2,164 courses.
			438 learners completed at least three courses each
			205 learners joined and are currently learning on the Career Academy Programme.
		Partnerships for Digital Skills Outreaches The partnership with American Towers Corporation Nigeria (ATCN) Foundation aims to upskill young Nigerians in remote communities by establishing purpose-built learning centres. The initiative in partnership with Cisco and Tech4Dev enabled young people to access instructor-led or self-guided digital literacy education and career skills.	78 Digital Communities (DCs) equipped with workstations, computers and internet devices bundled with data were established across 29 states in Nigeria.
			47,000 beneficiaries were trained across various DCs

	Focus Area	Initiatives	Objectives	2024 Beneficiaries
Introduction	Economic Empowerment (contd.)	Partnership with Sightsavers	The initiative empowers young jobseekers living with disabilities, offering a specialised nine-month IT training and hands-on experience.	In 2024, participants of the second cohort benefitted from MTN Foundation's provision of 52 internet devices bundled with data.
		MTN y'ello preneur Initiative	The initiative aims to reduce women's unemployment and foster their entrepreneurial growth through comprehensive support in capacity building, financial access, and advisory services for sustained business success. It is implemented in partnership with the Enterprise Development Centre (EDC) of Pan Atlantic University and Zenith Bank Plc.	628 female entrepreneurs completed a five-week training and two-week advisory session in business management.
				125 businesses were recommended by the industry experts to apply for equipment loans/grants of up to N3 million per entrepreneur.
		MTN Community Development Project (CDP)	Aimed at supporting the government's efforts to promote sustainable socio-economic development in communities across Nigeria, this project focused on providing access to clean water and promoting environmental sustainability.	We installed eight solar-powered boreholes across eight states in Nigeria.
Our Sustainability Context				
Governance				
Strategy				
Risk Management	Other projects	Orphanage Support Initiative	This is dedicated to aiding orphaned and vulnerable children in Nigeria through annual donations of food and household items to orphanage homes nationwide, as well as promoting their well-being and development.	In 2024, 41 orphanage homes across 22 states were supported with food and household items.
Metrics & Targets		Activism Campaign Against Gender-Based Violence (GBV)	This initiative seeks to raise awareness against gender-based violence particularly against women and girls annually. In 2024, the campaign themed 'No Excuse' and featured a virtual webinar, radio sensitisation sessions, and movie screening.	450 MTNers attended the movie screening, which highlighted the importance of speaking up against gender-based violence, seeking help when needed and leveraging all the resources in our arsenal to fight against every form of abuse.

Doing It Right

Operational & Institutional Pillars

Introduction	At MTN Nigeria, we recognise that operating a responsible and sustainable business requires a solid foundation in ethics, governance, compliance, and risk management. These principles are deeply embedded in our operations, guiding our engagements with customers, partners, employees, and regulators. By prioritising transparency, accountability, and compliance, we foster trust and long-term sustainability in everything we do.
Our Sustainability Context	
Governance	
Strategy	We uphold the highest standards of ethical conduct, ensuring that our business decisions are made with integrity and due diligence. Our governance framework is designed to mitigate risks, prevent corruption, and promote transparency, reinforcing our dedication to responsible business practice. Through strict adherence to regulatory requirements and internal policies, we maintain an ethical work environment that supports both compliance and corporate accountability.
Risk Management	
Metrics & Targets	Protecting customer data is fundamental to maintaining trust. We continuously invest in security measures to safeguard personal information, aligning with international standards and regulatory requirements. Our approach includes: • Strengthening internal security protocols to prevent data breaches. • Enhancing operational processes to protect customer privacy. • Implementing stringent controls to ensure responsible data handling.
Appendix	By integrating these governance and compliance measures into our daily operations, we reinforce our commitment to ethical leadership, regulatory excellence, and long-term stakeholder trust.

At MTN Nigeria, 'Doing It Right' means:

Protecting Information, Ensuring Trust

In an increasingly digital world, protecting customer data and ensuring network security are fundamental to sustaining trust. We recognise that data security, privacy, and transparency are critical to our operations. As cyber threats evolve, we continue to strengthen our internal control systems, data protection frameworks, and cybersecurity measures to safeguard our customers, employees, and business partners.

Introduction

Our Sustainability Context

Appendix

Our approach to data protection is governed by our Data Privacy and Protection Policy. This protection policy establishes clear guidelines which include:

- Lawful data collection and processing, ensuring that all customer information is obtained with appropriate consent.
- Data security controls, including encryption, role-based access, and secure storage mechanisms.
- Strict compliance with the Nigeria Data Protection Act 2023, which aligns with international best practice and ensures that customers digital rights are protected.
- Customer information handling procedures, which define the lawful basis for data retention and disposal.

In addition, we ensure that personal data collection, processing, storage, transfer, and disposal adhere to strict security protocols, maintaining the highest level of confidentiality and transparency. To reinforce these security efforts, in 2024 we implemented a multi-layered data security framework which includes:

- Data Encryption for information at rest and in transit
- Role-Based Access Control (RBAC) and Privileged Access Management
- Network Firewalls, Intrusion Detection, and Prevention Systems (IDS/IPS)
- Secure VPN with Two-Factor Authentication (2FA)

- Endpoint Detection & Response (EDR) and Data Loss Prevention (DLP)
- Cloud Access Security Broker (CASB) and Secure Web Gateway
- Regular internal and external security audits to assess vulnerabilities and compliance
- Customer data retention aligned with regulatory directives, ensuring a minimum of five years post-exit from our network.

It is important to note that there were Zero recorded incidents of customer privacy breaches, underscoring our unwavering commitment to data security..

Ensuring Transparency in Data Governance

We are fully committed to transparency in how customer data is handled, responding to law enforcement requests within the framework of legal compliance. In 2024, we received 43,034 law enforcement requests for customer data, of which 42,602 were granted fully, and 432 were granted partially, in compliance with regulatory requirements. However, no customer content data was disclosed.

We adhere to global best practices, such as ISO 27001 and the Payment Card Industry Data Security Standard (PCIDSS), reinforcing our dedication to effective security measures. To ensure independent verification of our

compliance, we conduct annual Information Technology General Controls (ITGC) audits, supplemented by periodic external security assessments.

Strengthening Cybersecurity

To proactively manage cyber risks, MTN Nigeria employs a rigorous cybersecurity framework aligned with industry-leading standards, including the National Institute of Standards and Technology (NIST) and ISO 27001:2022.

Our cybersecurity initiatives include:

- Automated vulnerability scanning and penetration testing.
- Subscription to bug bounty programmes to detect and mitigate emerging threats.
- Integrated Dynamic Threat Intelligence systems for real-time threat monitoring.
- Continuous security awareness training for employees to enhance vigilance.
- Annual IT General Control (ITGC) audits conducted by external assessors.

As a core element of our security culture, we maintain appropriate classification and protection for every information asset. Our Enterprise Risk Management (ERM) framework integrates security risks into corporate governance, maintaining alignment with business objectives and regulatory compliance.

Case Study

Child Online Safety Campaign

As a signatory to the United Nations Global Compact (UNGC) and GSMA Mobile Alliance Against Child Sexual Abuse, MTN Group launched its Child Online Protection Initiative by signing a partnership with the Internet Watch Foundation (IWF).

Through its partners, the Group commissioned a study across three OPCOs (Nigeria, Zambia, and South Sudan) to investigate how children and adolescents between ages 8 and 17 use the internet with the primary goal of obtaining insight into ways of enhancing online child safety and how to mitigate the exploitation and abuse of children online.

The study culminated in the release of the “Help Children Be Children Report (HCBC Report)” which highlights the risks associated with digital engagement, including exposure to Child Sexual Abuse Material (CSAM).

In December 2024, the outcome and key findings of the HCBC Report were distilled through a press release to the Nigerian public. In 2025, the HCBC campaign will be deployed in full towards creating a safer digital environment for children through targeted education, heightened awareness, and strategic collaboration with key stakeholders in line with our commitment to zero tolerance for all forms of abuse and exploitation.

MTN Nigeria is committed to child safety on the internet with zero tolerance for all forms of abuse and exploitation. We believe that every child deserves a safe and protected childhood.

Championing Digital and Human Rights

We remain steadfast in our commitment to promoting digital and human rights, ensuring that technology is utilised to empower rather than suppress. Our policies align with the UN Guiding Principles on Business and Human Rights, reinforcing our dedication to privacy, security, and responsible digital governance.

287 employees participated in the workplace harassment virtual attestation course, which covered our Workplace Harassment Policy and 'A Guide to a Harassment-Free Workplace.' As part of this initiative, employees were required to formally attest to their understanding and commit to upholding a harassment-free environment. This effort reinforces our dedication to promoting a workplace culture of dignity, respect, and inclusivity.

We have taken significant steps to protect and champion digital rights as evidenced in our Board approved Digital Rights policy. We actively track and report digital rights metrics monthly, ensuring continuous evaluation and improvement. While there were no major incidents of human rights violations reported in 2024, two previously recorded cases remain unresolved. We are committed to resolving these cases diligently and strengthening mechanisms for human rights protection across all operations.

Additionally, we uphold a Customer Charter that embodies our pledge to safeguard user rights, ensure responsible and transparent data usage, and address concerns related to privacy and digital safety. This charter solidifies our commitment to ethical data governance, aligning with local regulations and global best practice to provide safe, reliable, and customer-centric services.

Customer Health and Safety

The health and safety of our customers remain a fundamental commitment. We prioritise customer safety by partnering with Original Equipment Manufacturers (OEMs) who are required to provide certificates confirming that all potential health hazards have been eliminated during production. This ensures that only compliant and safe products reach the market.

Our responsibility to customer safety is reflected in our compliance measures and proactive incident monitoring, ensuring adherence to the highest health and safety standards. In 2024:

- No incidents of non-compliance concerning the health and safety impact of products and services were recorded in 2024.
- No regulatory actions or penalties were issued due to customer safety-related concerns.
- Health and safety requirements are integrated into our procurement process, ensuring all OEMs adhere to international safety standards before product release.

Our Commitment to Customer Well-being

Beyond product certification, we continuously reviews our processes to align with evolving global safety standards and best practice. As we expand our service offerings and introduce new technologies, we remain dedicated to enhancing safety protocols, improving compliance measures, and ensuring that our customers can confidently engage with our products and services.

Respecting and Protecting Your Data

In today's digital age, protecting customer data is not just a regulatory obligation, it's a core element of our commitment to transparency, trust, and ethical responsibility. We recognise the importance of safeguarding personal data, ensuring privacy rights are respected, and upholding our duty of care towards millions of customers who rely on our network daily.

The provisions of the Nigeria Data Protection Act 2023 guides our Data Privacy and Protection Policy. The policy sets out principles for the collection, processing, storage, transfer, and disposal of personal data. This ensures that the rights of data subjects are upheld, with a strong emphasis on user consent and data minimisation. The data collected, including KYC information, biometric details, visitor data, and website usage data, are processed solely for purposes aligned with legal and operational requirements. Services, such as Value-Added Services (VAS), require explicit opt-in consent, ensuring that users maintain control over how their data is utilised.

Data Handling and Security Measures

The Information Security Policy outlines standard safeguards to ensure the confidentiality, integrity, and availability of personal data. We employ a security framework which incorporates:

- Automated vulnerability scans
- Penetration testing and independent security assessments

Case Study

- Bug bounty programmes
- Data encryption and perimeter hardening
- Endpoint security, network segmentation, and access control

These measures ensure that data is protected against unauthorised access, breaches, and cyber threats. In 2024, there were no recorded incidents of customer data breaches, underscoring the effectiveness of our data protection protocols.

Law Enforcement Requests and Data Disclosures

We comply with legal obligations related to data requests from law enforcement agencies. In 2024:

- A total of 43,034 requests for customer information were received, with all corresponding customer data formally requested.
- Of these, 42,602 were fully granted, with 432 partially granted.
- All requests pertained to non-content data, with no content data disclosed.

The process of responding to such requests strictly follows legal protocols, ensuring that data is only shared when legally mandated and with appropriate oversight.

Use of Customer Data and Secondary Purposes

There were no instances of customer information being used for secondary purposes in 2024. While customer data is primarily used for providing core telecommunication services, it may also be processed for secondary purposes such as website management, partner engagement, and service enhancements. This is always

Our Digital Store – 5G Experience Centre

In October 2024, MTN Nigeria marked a significant milestone by launching Nigeria's first telecom-operated 5G Digital Service Centre. This initiative underscores our commitment to leveraging cutting-edge technology to transform customer engagement and service delivery.

The 5G Digital Service Centre provides an immersive experience, allowing customers to explore and interact with advanced digital solutions. Equipped with self-service kiosks, the centre empowers users to independently manage a range of services digitally. A key feature is the demonstration of smart home technologies, showcasing how data connectivity enables the remote control of home appliances and security systems from anywhere globally. This highlights our dedication to integrating advanced technology into everyday life, enhancing convenience and security.

This launch aligns with MTN Nigeria's history of pioneering technological advancements in the telecommunications sector. From being the first to introduce 3G and 4G services, to now leading 5G rollout, we have consistently driven innovation in the country.

The establishment of the 5G Digital Service Centre is a testament to our vision of a digitally inclusive Nigeria. By offering a platform for customers to experience the capabilities of 5G firsthand, we are not only improving service delivery but also fostering the adoption of new technologies that will propel Nigeria towards a more connected and prosperous future.

in compliance with data protection laws, ensuring that data subjects' rights are preserved.

Customer Satisfaction and Service Continuity

Customer satisfaction is directly tied to service reliability. In 2024, the system average interruption duration was 42 minutes, demonstrating efforts to minimise downtime, ensure uninterrupted service, and maintain consistent connectivity.

Our network management protocols include:

- System Average Interruption Frequency Index (SAIFI) and Customer Average Interruption Duration Index (CAIDI) metrics to measure and improve service reliability.
- Redundancy protocols and backup infrastructure to ensure unimpeded service during outages.
- Regular infrastructure upgrades to improve network resilience and reduce downtime.

Empowering Customers with Data Control

Customers are kept informed about how their data is collected, used, and stored through Data Privacy Notices available at all data collection points. They are also provided with options to opt-in or opt-out of specific data uses, particularly for services that involve behavioural tracking or marketing purposes. The Data Archiving and Disposal Policy ensures that customer data is retained for a minimum of five years following service termination, in line with regulatory requirements, after which it is securely deleted in accordance with data protection standards.

Case Study

Strengthening ESG Performance through Risk Insights Rating

We reaffirmed our commitment to sustainability by achieving an ESG Risk Insights Rating of 3.6/4.0, which placed the organisation in the "Excellent" category within the ICT sector. This rating reflects MTN Nigeria's strong ESG performance, underscoring our efforts in responsible business practices, regulatory compliance, and stakeholder engagement. The recognition highlights MTN Nigeria's progress in reducing its carbon footprint, integrating renewable energy solutions, and advancing circular economy initiatives such as e-waste recycling.

Beyond environmental responsibility, we also demonstrated outstanding social performance for our commitment to diversity, employee wellbeing and community development, earning another 'Excellent' rating. Key initiatives include workforce diversity programmes, zero workplace fatalities, and investments in education and healthcare through the MTN Foundation.

We secured a "Good" rating on governance, reflecting our strong board oversight, cybersecurity measures, and anti-corruption policies, reinforcing trust among stakeholders.

Embedding Responsible Business Practices

Ethical conduct is the cornerstone of our operations. Our commitment to business ethics transcends compliance, and encourages a culture of integrity, transparency, and accountability across all levels of our organisation. This commitment is embedded in our Code of Conduct, guiding employees, partners, and stakeholders in daily interactions.

To proactively combat unethical practices, we have implemented a Fraud Risk Management Framework. In 2024, we conducted proactive fraud risk assessments across nine critical business processes, including:

- Asset disposal
- Gifts and hospitality
- Payment processing and
- SIM registration device management.

Our Forensic Services team follows the MTN Group Proactive Fraud Risk Management methodology, ensuring that identified risks such as bid manipulation, mismanagement of assets, and conflicts of interest are promptly addressed. Our zero-tolerance stance on corruption is reflected in our annual fraud awareness sessions for employees and partners.

The annual Employee Fraud Awareness Training programme, a key component of our ethics training calendar, impacted 1,281 employees through virtual and in-person sessions. Additionally, the Partners and Suppliers Fraud Awareness Training had 589 participants in attendance, reinforcing our commitment to promoting integrity and ethical practices throughout our extended network.

We are committed to maintaining a fair and competitive market environment, operating within the framework of fair competition laws and anti-trust regulations. Our business practices are guided by transparency, ethical conduct, and compliance with industry regulations to foster healthy competition and drive sustainable growth.

In 2024, no cases of anti-competitive behaviour, antitrust violations, or monopolistic practices were reported or identified. However, the Federal Consumer and Competition Protection Commission (FCCPC) initiated an investigation into the composition of MTN Nigeria's Board of Directors concerning potential anti-competitive conduct. By the end of the year, no conclusions had been drawn or reported regarding the matter. This reflects our dedication to adhering to the GRI 206-1 standard, ensuring that our market operations align with global best practice and regulatory expectations.

Case Study

2024 CDP Performance

Our efforts have been recognised in our 2024 CDP (Carbon Disclosure Project) ratings, which marks significant progress in climate change management and water security practices.

In our latest assessment, we earned a “B-” rating for climate change and a “C” rating for water security. These scores reflect MTN Nigeria’s ongoing sustainability initiatives, transparency in environmental reporting, and continuous improvements in energy efficiency and resource management.

The “B-” rating in climate change underscores our proactive approach towards emission reduction, renewable energy adoption, and strategic implementation of low-carbon technologies. This score positions the organisation in the ‘Management’ band, signifying that MTN Nigeria is taking coordinated action on climate issues.

For water security, the “C” rating highlights MTN Nigeria’s awareness and initial steps in addressing water-related sustainability challenges. While there remains room for improvement, this score reflects our commitment to integrating water stewardship into our broader sustainability strategy.

We aim to build on these achievements by enhancing climate resilience and strengthening our water conservation efforts. With an ambition to achieve net-zero emissions by 2040, we will continue to align our strategies with global sustainability frameworks to improve future CDP scores.

Disciplinary Actions and High-Profile Cases

In 2024, we conducted corruption risk assessments across nine critical business processes, including asset disposal, sponsorship management, SIM registration device management, and network equipment inventory. These assessments allowed us to proactively identify and address risks such as bid manipulation, asset mismanagement, and conflicts of interest, ensuring the integrity of our operations.

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

As part of our zero-tolerance approach to corruption, disciplinary actions were taken where violations were identified:

- Three employees were dismissed due to confirmed corruption incidents.
- Eleven employees faced disciplinary measures.
- Two employees resigned during investigations.
- A vendor contract was terminated after evidence of collusion with an employee was uncovered.

Additionally, we addressed a high-profile case of sexual misconduct and victimisation, reinforcing our commitment to maintaining a safe and respectful workplace. Through continuous training, awareness campaigns, and a well-established whistleblowing mechanism, we empower employees to report unethical behaviour without fear of retaliation. These efforts reflect our firm stance on transparency, accountability, and ethical governance, ensuring a workplace culture built on trust and integrity.

Championing Transparency and Accountability

We recognise that transparency and accountability are key pillars of corporate governance. There is a strict enforcement of anti-corruption policies at MTN Nigeria, and we maintain active whistleblowing channels. In 2024, 57 whistleblower cases were recorded, with all cases investigated under our whistleblower protection framework to ensure anonymity and safeguard against retaliation.

Our anti-corruption initiatives extend beyond internal operations. We assess supplier and partner compliance with our ethical standards

Case Study

Sustainability Microsite

We launched a Sustainability Microsite, reinforcing our commitment to transparency, stakeholder engagement, and responsible business practice. This platform serves as a central hub where stakeholders, including customers, investors, and partners, can explore our ESG strategies, achievements, and future commitments. It also provides an avenue for direct engagement with our Sustainability and Shared Value Team, which allows visitors to ask questions, share feedback, and participate in our sustainability journey.

Designed to enhance accessibility, the microsite offers insight into MTN Nigeria’s sustainability initiatives, from climate action and digital inclusion to community empowerment and ethical governance. Additionally, it features detailed reports, policy extracts, and programme highlights, ensuring stakeholders stay informed about our ongoing efforts.

For more on how we are Doing
for tomorrow, today, click here

through regular audits and mandatory training. MTN Nigeria's fraud prevention strategy is driven by proactive risk assessments and the adoption of best practice, such as the ISO 37001 Anti-Bribery Management System.

Strength in Flux: A Resilient Approach

In an era marked by rapid change, resilience is key to sustained growth. Our Business Resilience Model integrates risk management, ethical conduct, and comprehensive compliance structures to safeguard operations against disruptions.

Our approach to risk management aligns with ISO 31000 and the COSO ERM framework, focusing on identifying, assessing, and mitigating risks. In 2024, the framework was stress-tested against external threats, ensuring operational continuity and long-term stability.

The management of the legal and regulatory environment is guided by our strong governance structure, which ensures strict adherence to regulatory requirements. In 2024, no regulatory sanctions were received from the Nigerian Communications Commission (NCC), reflecting our dedication to legal compliance. We also maintained open lines of communication with key

regulatory stakeholders, enabling swift responses to changes in the legal landscape.

Ethical Conduct & Legal Integrity

Our organisation continuously strengthens its legal and regulatory frameworks to prevent misconduct and safeguard stakeholder interests. In 2024, we recorded no significant instances of non-compliance with laws and regulations, reflecting our firm commitment to legal integrity. While maintaining this high standard, we also engage in continuous improvement, ensuring our policies and procedures evolve alongside regulatory requirements.

To further enhance ethical conduct, we integrate integrity training into onboarding programmes and provide regular workshops on compliance topics. Our annual Board evaluations include assessments of ethical leadership and governance practices, ensuring that the highest levels of our organisation embody MTN's core values.

In 2024, 57 whistleblower cases were recorded, with all cases investigated under our whistleblower protection framework to ensure anonymity and safeguard against retaliation.

As we look towards 2025 and beyond, MTN Nigeria is focused on further strengthening its ethical foundation and responsible business practices.

Our future initiatives include:

- Expanding fraud awareness programmes to cover all regional operations.
- Enhancing whistleblower protection to foster a more transparent work environment.
- Deploying risk assessment tools for the continuous proactive identification of emerging risks in the ever-evolving business landscape.
- Increasing collaboration with regulators and industry peers to promote responsible business practices.

Our vision is to build a resilient, transparent, and ethical organisation that not only complies with regulatory requirements but also champions the highest standards of integrity in Nigeria's telecommunications sector.

Doing for Growth

Economic & Financial Pillars

MTN Nigeria remains committed to driving economic growth through strategic investments, responsible procurement, and supporting local enterprise development. This section outlines our approach to empowering local businesses, expanding infrastructure, and ensuring that our operations contribute meaningfully to Nigeria's economy. We focus on enhancing market access, supporting tax contributions, and promoting ethical supply chain management, all the while delivering value for our stakeholders and the broader community. We also provide insight into how our financial and economic actions support sustainable growth and development in line with our long-term business strategy.

For us 'Doing for growth' means:

Enabling local economies by contributing to national growth through tax revenues and investment in network and IT infrastructure to stimulate development.

Unlocking local ownership by driving, localisation efforts and contributing toward job creation, ensuring that the benefits of our operations are shared widely within the communities we serve.

[Introduction](#)[Our Sustainability
Context](#)[Governance](#)[Strategy](#)[Risk Management](#)[Metrics & Targets](#)[Appendix](#)

We asked our CFO...

How does the company communicate its sustainability performance to investors, and how does this affect access to capital and the cost of financing?

We communicate our sustainability performance to investors through clear, transparent reports aligned with global standards like GRI and IFRS. We also engage directly with investors through meetings, roadshows, capital market days, and quarterly conference calls to highlight the tangible impact of our initiatives. This approach has helped us to build trust, improved our ESG ratings, and opened doors to more favourable financing options, which will ultimately lower our cost of capital and demonstrate our commitment to long-term value creation.

Kadri**

Chief Financial
Officer (CFO)

Significant Indirect Economic Impacts

Our operations have significantly contributed to indirect economic growth through tax payments, local procurements, and corporate social investments. In 2024, we invested N3.5 billion through the MTN Foundation, impacting over 663,300 individuals across 225 communities by upgrading healthcare facilities, awarding scholarships, and enhancing educational infrastructure. Additionally, we paid N764.2 billion in taxes, levies, and duties, bringing our total contributions since inception to over N5.8 trillion. Our procurement strategy empowered 1,116 local suppliers in 2024, has facilitated over N8.1 trillion in earnings for suppliers, and has provided over N1.2 trillion in payments to airtime dealers since inception. Furthermore, our extensive distribution network created over 1 million jobs across retailers, agents, and trade partners, reinforcing our commitment to economic growth and social development.

In 2024, we generated N3.4 trillion in revenue and distributed a total economic value added of N1.8 trillion. A total of N91.9 billion was paid for employee wages and benefits, while our payment to capital providers was N1.4 trillion, representing finance costs and net foreign exchange losses. The net foreign exchange losses arose from the significant devaluation of the Naira following the liberalisation of the foreign exchange management by the Central Bank of Nigeria. The payments due to the government amounted to N149.9 billion, representing an income tax of N21.1 billion and a deferred tax of N170.9 billion due to the adjustment for foreign exchange losses.

While our results reflect challenges in financial performance, we are making efforts to assess, improve and strategise for growth. We continue to maintain our commitment to creating long-term value for stakeholders and contributing to the nation's economy through our operations.

Value Added Statement

	2024 N million	2023 N million
Economic Value Created (EVC)	1,428,825	1,298,297
Economic Value Distributed (EVD)	1,829,260	1,435,318
Employees	91,919	65,002

Deferred tax	(170,955)	(196,376)
Retained in the business	530,222	433,820
Depreciation	444,471	349,836
Amortisation	90,684	79,033
Impairment	(4,933)	4,951
Economic Value (Lost)/ Retained (EVC-EVD)	(400,435)	(137,021)

Partnering for an Ethical Supply Chain

Maintaining a responsible and ethical supply chain is non-negotiable for us. Our suppliers undergo a rigorous screening process, which includes the World Health Check (WHC) Report. This process ensures that all directors of the applying company are vetted through a comprehensive Risk & Compliance background check. Only those who meet our ethical and operational standards proceed to registration, reinforcing our commitment to transparency and integrity.

In 2024, 100% of newly registered suppliers (excluding government entities) completed this process, demonstrating our unwavering stance against unethical business practices. We recorded zero incidents of negative social impact in our supply chain, a testament to our proactive approach to preventing, monitoring, and mitigating risks. Additionally, our Supplier Code of Conduct is a guiding framework, ensuring that every supplier aligns with our safety, ethical, and compliance expectations.

Supply Chain Management

Our procurement strategy is designed to maximise local value creation, with the majority of our procurement budget allocated to Nigerian suppliers as much as possible and applicable. We prioritise suppliers who meet key geographical and operational criteria, such as:

- Being registered in Nigeria and trading in Naira,
- Having a physical office within the country,
- Accepting purchase orders and payments in Naira, ensuring financial inclusivity and economic stability.

Total Procurement Spend

Note: Total procurement spend includes cost of sales, operating and capital expenditure costs

Our supply chain management extends across diverse categories, including site leases, system support services, installation and commissioning, airtime, telecoms materials, consulting services, and operational leases. This diversified approach strengthens our supply chain resilience and creates vast business opportunities for local enterprises.

Strengthening Partnerships

At MTN Nigeria, we recognise the importance of building strong, mutually beneficial relationships with our suppliers. To achieve this, we are developing a supplier education and training framework. This initiative aims to enhance the capacity and competitiveness of our suppliers, ensuring they adhere to global best practices.

Our approach prioritises open communication, providing local businesses with access to necessary resources and support. By fostering collaborative relationships, we promote supply chain integrity, trust, and reliability among our partners.

We are committed to driving economic prosperity and sustainability in Nigeria. To achieve this, we focus on enforcing ethical procurement standards, strengthening supplier relationships, and exploring opportunities for local collaboration.

Local Collaboration and Supply Chain Ethics

Promoting and encouraging local economic growth is at the heart of our procurement strategy. We believe in empowering Nigerian enterprises, ensuring that our supply chain strengthens the nation’s economy while upholding the highest standards of ethics and sustainability. Our commitment to local sourcing is unrelenting, and in 2024, 59.6% of our total procurement spend was directed towards local suppliers, amounting to N1.48 trillion. This reflects our continued efforts to invest in Nigerian businesses, fostering economic resilience and self-sufficiency.

Our Approach to Taxation

Our tax strategy is anchored on transparency, consistency, and defensibility. We adhere to a defined Tax Strategy Framework, ensuring compliance with evolving tax legislation while maintaining alignment with our broader Ambition 2025 Strategy. We maintain a zero-tolerance policy for non-compliance, adhering strictly to

all tax laws. The MTN Nigeria Board, Audit Committee, and the Chief Financial Officer (CFO) oversee the review of the tax governance structure conducted as new tax legislations emerge or as deemed necessary.

Our quarterly tax risk reporting, reviewed by the Risk Management and Compliance Committee, Board Audit Committees, and Group Board of Directors, ensures that potential risks are identified, measured, and managed within an acceptable tolerance level.

Our tax principles are guided by the following:

- Integrity and transparency in all tax matters.
- Adherence to a clearly defined Tax Strategy governing the conduct of tax professionals within MTN Nigeria.
- Commitment to ethical practices, ensuring that we neither condone tax evasion nor engage in corrupt practices.

Tax as a Catalyst for Economic Growth

We integrate taxation into our overall business sustainability agenda by ensuring that our tax contributions translate into economic value for the nation and its stakeholders. As one of the largest taxpayers in Nigeria, we contribute significantly to national revenue, supporting essential public services, infrastructure development, and economic resilience.

Tax governance is embedded in our decision-making processes, with clear lines of communication, defined roles, and strong financial systems configured for compliance. This integration is evident in:

- Our alignment with the **‘Create Shared Value’** priority of the Ambition 2025 Strategy.
- The economic value added to Nigerian society and stakeholders through our tax contributions.
- Our position as a Value Added Tax (VAT) withholding agent, an appointment by the Federal Inland Revenue Service (FIRS), which ensures our tax compliance across business transactions.

Additionally, internal audits are conducted periodically to evaluate tax compliance levels across different tax categories, ensuring alignment with local and international regulations.

We are one of the largest contributors to government revenue. In 2024, we contributed the sum of N764.2 billion paid in taxes, levies, and duties to the Federal Government of Nigeria. Our tax contributions support critical public services, infrastructure development, and economic progress across Nigeria. Through transparent tax governance, responsible risk management, and ethical compliance, we continue to play an important role in bridging economic growth and creating a shared value.

Engagement with Tax Authorities and Stakeholders

Transparency is at the core of our engagement with tax authorities. We maintain open and constructive communication with regulators, ensuring a collaborative approach to tax matters.

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Appendix

Additionally, we actively participate in policy discussions with national and international organisations, contributing insights that shape tax legislation and promote sustainable investment.

Through scheduled engagements with internal and external stakeholders, we incorporate their feedback into our tax strategy. This maintains the relevance, responsibility, and societal alignment of our tax policies. Structured mechanisms are also in place for employees and stakeholders to report tax integrity concerns, maintaining ethical standards across all governance levels.

Network Infrastructure for Economic Growth

We recognise that good network infrastructure is essential for driving economic growth, fostering digital inclusion, and unlocking new opportunities for communities, businesses, and individuals. Our commitment to expanding and upgrading our network and IT infrastructure ensures seamless, secure, and resilient connectivity for all.

As Nigeria’s leading telecommunications provider, we continue to bridge digital divides, empower communities, and support businesses through strategic network investments. In 2024, we made significant strides in fortifying our infrastructure, enhancing broadband coverage, and strengthening data security to improve the digital experience for customers in both urban and rural areas.

Investing in Network and IT Infrastructure to Unlock Growth

To sustain Nigeria’s digital revolution, we continue to make significant investments in network expansion and technological advancement. These investments are crucial for economic growth, enabling businesses, startups, and individuals to leverage digital platforms for trade, communication, and innovation.

Some of our investments in 2024 include:

- Deployed 1,321 new 4G network sites, increasing coverage and improving network speed.
- Expanded 4G population coverage to 82.4%, ensuring more Nigerians have access to high-speed internet.
- Deployed 293 new 5G network sites, positioning Nigeria as a leader in next-generation connectivity.
- Extended fibre optic coverage to 42,884.9 km, reducing latency and improving broadband penetration.
- Enhancements to our data processing capacity, with 422 rack spaces dedicated to supporting high-volume data traffic.
- Investments in cloud-based infrastructure, with 25% of our licences and subscriptions now cloud-based.
- Increased rural coverage to 81.3% for voice and 73.1% for broadband, with 2,991 rural telephony sites established, ensuring more remote communities can access mobile services.
- Invested N443.5 billion in capital expenditure (excluding leases) to support network expansion, strengthening infrastructure resilience and

reliability, despite a 1.3% decrease from the previous period.

In addition to expanding our physical infrastructure, we prioritise network security and customer privacy. Our commitment to protecting customer data is underscored by our MTN Data Privacy and Protection Policy, which governs how we collect, process, store, and secure personal data in compliance with the Nigeria Data Protection Act 2023.

We also recorded zero incidents of customer privacy breaches in 2024, reflecting the strength of our security policies and proactive risk management strategies.

Building a Resilient and Secure Network

As we expand our infrastructure, we remain mindful of the challenges posed by climate change, cyber threats, and evolving regulatory requirements. Our efforts in 2024 focused on enhancing network resilience to withstand environmental and security risks. Some of our resilience methods include:

- **Climate Adaptation:** To mitigate the effects of extreme weather, we implemented business continuity plans, including elevating critical infrastructure in flood-prone areas and deploying alternative energy solutions. In 2024, 83 BTS (base transceiver stations) sites were impacted by flooding, with 82 of them in Borno State, leading to an estimated financial impact of N128 million.

Introduction

Our Sustainability Context

Governance

Strategy

Risk Management

Metrics & Targets

Appendix

- **Cybersecurity and Data Protection:** We strengthened data security policies, implementing global best practices such as ISO 27001:2022 and NIST cybersecurity standards to protect customer information.
- **Regulatory Compliance:** Our operations remain aligned with Nigeria’s Communications Act, ensuring compliance with lawful interception policies, data protection regulations, and unsolicited SMS filtering requirements.

Empowering Businesses and Communities

Our investment in network infrastructure has boosted economic participation by enabling:

- **MSME Growth:** Our enhanced digital infrastructure has supported over 1,116 MSMEs, improving access to digital tools and financial services.

- **Job Creation:** The expansion of our network and trade partnerships has contributed to the creation of over 1 million direct and indirect jobs.
- **Expansion of Broadband Coverage:** The number of Nigerians covered by high-speed internet has grown, with 3.2 million home broadband subscribers (1.2 million new additions in 2024) and active data users increasing by 7% to 47.7 million in 2024, bridging the digital divide. Our commitment to expanding connectivity is reflected in the steady increase in broadband subscribers, with 2.9 million subscribers recorded under RGS 30 and 3.2 million under RGS 90. The RGS 30 focuses on core broadband infrastructure (fixed-line urban areas), while RGS 90 includes a more extensive broadband user base, integrating wireless, fibre, and rural connectivity solutions.

- As part of our long-term growth commitment:
- We continue to uphold responsible procurement practices.
 - Contribute to the growth of local enterprises, job creation, and the nation's economic resilience.
 - Strengthen communities, ensuring underserved communities benefit from our operations and services.

Metric category	Disclosures	Unit of measure	Disclosure
Introduction Our Sustainability Context	Greenhouse gases • Approach used to measure Scope 1 and 2 GHG emissions for consolidated accounting group, associates, joint ventures, and unconsolidated subsidiaries. • List of the categories included within the entity's measure of Scope 3 GHG emissions. • Additional information about the entity's greenhouse gas emissions associated with its investments, if the entity's activities include asset management, commercial banking or insurance.	Description	Please refer to GHG Accounting Methodology section
Governance Strategy Risk Management	Climate-related transition risks • The amount and percentage of assets or business activities vulnerable to climate-related transition risks.	The amount and percentage	Business activities such as supply chain as well as operations and infrastructures associated with high energy consumption and emissions generation are vulnerable to transition risks. They are associated with changing regulatory compliance costs like carbon emissions regulation, supply chain disruptions and ESG-driven market demand change. These are properly managed as part of our broader risk assessment process.
Metrics & Targets Appendix	Climate-related physical risks • The amount and percentage of assets or business activities vulnerable to climate-related physical risks.	The amount and percentage	Telecommunication towers, data centres, operational vehicles and our freehold and leasehold buildings are vulnerable to climate related risks which can also affect our operations. However, telecommunication towers, which are the most vulnerable, have been outsourced to third party partners. This reduces our financial and operational exposure to the risk associated with their use.
	Capital Deployment • The amount of capital expenditure, financing or investment deployed towards climate-related risks and opportunities. • Investment in climate adaptation and resilience measures. • Investment in climate mitigation measures.	The amount and percentage	Our Project Zero is focused on reducing greenhouse gas (GHG) emissions in our operations by enhancing operational efficiencies, reducing energy consumption, and investing in renewable energy sources. In 2024, N965.6 million, which represents 0.2% of our core capital expenditure (ex-leases), was allocated to net zero initiatives.

Cross Industry Metrics (contd.)

Metric category	Disclosures	Unit of measure	Disclosure
Internal carbon prices	- An explanation of whether and how the entity is applying a carbon price in decision-making (for example, investment decisions, transfer pricing and scenario analysis). - The price for each metric tons of greenhouse gas emissions the entity uses to assess the costs of its greenhouse gas emission.	Description and price	While we do not currently have an internal carbon pricing policy in place, we are actively evaluating this approach in accordance with IFRS S2 standards. We are committed to transparency and will report on the progress of our internal carbon pricing policy development in future sustainability reports.
Remuneration	- Description of whether and how climate-related considerations are factored into executive remuneration. - The percentage of executive management remuneration recognised in the current period that is linked to climate related considerations. - Weightage of all ESG-related KPIs on long (LTI) and short (STI) term incentive scorecards for executives and management. - Weightage of Climate-related KPIs on long (LTI) and short (STI) term incentive scorecards for executives and management.	Description and percentage	Our Executive Committee members have ESG targets representing 25% of their long-term incentive plans. These targets cut across key sustainability themes like climate change, expansion of broadband coverage, and specific, time-bound key performance indicators (KPIs) such as attaining a 50% female workforce by FY2030. This is to advance the sustainability agenda and embed deeper accountability and ownership across the company. In addition, our Executive Committee members have ESG-related targets in their short-term incentive plans, which comprise minimum of 10% of their annual Performance scorecard. These KPIs encompass carbon emissions reduction, reputation management, responsible business practices, community impact in terms of our digital and financial inclusion targets. While they relate to common sustainability themes, the focus and weightage varies for each executive given their different levels of influence and impact on these ESG KPIs. The Executive Committee's KPIs are also cascaded to their business units, and employees, whose performance bonus and other incentives are tied to their KPIs.

Sustainability Progress Tracker (Year-on-Year Performance Trend)

Sustainability Scorecard	Metric/unit	2022 Performance	2023 Performance	2024 Performance	Y-o-Y Change
Doing for Planet					
GHG emissions – Total (Scope 1 + 2)	tCO ₂ e	82,533	98,716	101,300	2.6%
GHG emissions – Scope 1	tCO ₂ e	55,698	58,356	55,066	-5.6%
GHG emissions – Scope 2	tCO ₂ e	26,835	40,361	46,234	14.6%
GHG emissions – Scope 3	tCO ₂ e	Not reported	1,091,393*	295,402*	-72.9%
Reduction in Scope 1 and 2 emissions (from 2021 baseline, intensity-based)	Percentage	25.0%	10.3%	11.0%	0.7pp
Total energy consumption	Gigajoules (GJ)	922,072	970,987	1,004,651	3.5%
Number of integrated renewable solar-powered rural telephony sites installed	Number	778	992	194	-80.4%
Total waste generated and disposed of (includes paper, plastic, iron, cans, wood, e-waste, liquid, and composite materials)	Tonnes	11.4	51.6	307.8	496.5%
Total water consumption	Megalitres (ML)	Not reported	60.3	4,701.0	7690.1%

* The decrease in emissions is primarily attributed to the transition from the 2002 EEIO emission factor to the 2018 EEIO emission factor. This change particularly impacted capital goods, investments, and purchased goods and services. Additionally, the lack of available emission factors necessary to quantify emissions in Categories 11 and 12 contributed to the reduction.

GHG Accounting Methodology

Introduction

MTN Nigeria is aligned with the MTN Group Guidelines on GHG emissions measurement and calculations, providing a detailed overview of the approach followed for our GHG emissions calculation process. In 2023, a Group-wide GHG Reporting Guideline was developed to specify the collection and compilation methodology of the Group’s GHG data in accordance with the GHG Protocol Corporate Accounting and Reporting Standard (2004) and the Greenhouse Gas Protocol Scope 3 Corporate Value Chain Standard. These standards were developed by the World Resource Institute (WRI) and the World Business Council for Sustainable Development (WBCSD). They provide requirements and guidance for companies and other organisations preparing a corporate-level GHG emissions inventory.

Our Sustainability Context

The standards cover the accounting and reporting of seven GHGs covered by the Kyoto Protocol – carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PCFs), sulphur hexafluoride (SF6) and nitrogen trifluoride (NF3). The GHGs covered and relevant to MTN operations are carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O) and hydrofluorocarbons (HFCs). The emissions calculations have been based on the Intergovernmental Panel on Climate Change (IPCC) 2006 and 2019 GHG Inventory guidelines.

Governance

Strategy

MTN has committed to science-based targets following a 1.5°C pathway. MTN will be using 2021 as a baseline year to set science-based targets. Science-based targets criteria require that the targets cover a company’s Scope 1, Scope 2 and Scope 3 emissions as defined by the GHG Protocol Corporate Standard.

Risk Management

MTN has included Scopes 1, 2 and 3 within its operational control for its GHG footprint. Under the operational control approach (which is used by MTN), a company accounts for 100% of emissions from operations over which it or one of its subsidiaries has operational control i.e., has full authority to introduce and implement its operating policies at the operations.

Metrics & Targets

Appendix

MTN’s Scope 1 emissions are caused by three emission sources:

- Mobile combustion: combustion of fuel in transportation devices. This includes petrol used for MTN owned vehicles and forklifts.
- Stationary combustion: combustion of fuels in stationary equipment. These include diesel used at MTN’s BTS sites, data centres, buildings and stores.
- Fugitive emissions: refrigerant refilling in offices and data centres. These include R22, HFC- 134a, R407c, and R410a.

MTN’s Scope 2 emissions mainly come from purchased electricity from the national grid or gas-powered IPP (independent power plant) for BTS sites, data centres, buildings, and stores.

Scope 3 GHG emissions

We employ four primary methods to estimate our Scope 3 emissions, each with distinct data requirements and levels of specificity. These include the supplier-specific method, hybrid method, average data method, and spend-based method. In addition to these approaches, specific Scope 3 categories may require alternative methods tailored to their unique needs. The table below outlines the primary methods used for measuring Scope 3 emissions.

Main methods for calculating Scope 3 emissions:

Main Method	Description	Data required and Calculation approach
Supplier- Specific Method	This involves collecting data directly from suppliers that are specific to their operations. This can be based on the product specific supplier categories.	Scope 1 and 2 data from suppliers relating to electricity, water, transportation and other supply chain activities. Using the collected data, applicable emission factors are applied to attain total emissions.
Hybrid Method	This involves primarily collecting supplier specific data where possible and other secondary data such as amount spent on purchased products to fill in the gaps where supplier specific data is not available.	This calculation method is dependent on the secondary method used. For example, if spend data is chosen to be used then invoice data for the purchased products are collected and the applicable factors related to spend are applied to attain total emissions.
Average Data Method	Emissions are estimated based on the data available and the units in which the data is provided. For example, mass or other relevant units of goods/services. Emission factors are in the form of emissions/unit of a product.	Data on the ‘unit’ of products – this can be mass, volume, hours, km etc. This will vary by category of emissions. The applicable factors related to spend are applied to attain total emissions.
Spend-Based Method	Emissions are estimated based on the financial value of goods and services purchased or procured. Emission factors for a group of products in a sector are in the form of emissions.	Invoice data for the purchased products where the amount spent on the produces is available and then the appropriate EEIO emission factors are applied to calculate the emissions.

Specific methods for Scope 3 categories used by MTN:

Scope 3 emission categories that are considered relevant to MTN and how their emissions are calculated are summarised in the table below.

	Scope 3 Category	Category Definition	Relevance to MTN	Approach, Calculation and Emission Factors
Introduction	Category 1 – Purchased Goods and Service	Emissions from the extraction, production and transportation of goods and services purchased or acquired not otherwise included in Categories 2 - 8	This includes emissions from outsourced TowerCos and the significant procurement spend categories such as devices provided to customers, developing and programming software, network infrastructure maintenance.	Combination of supplier-specific method and spend-based method. For procurement spend data, emissions were calculated either using applicable life cycle assessment (LCA) methodologies or using the 2018 Environmentally Extended Input-Output “EEIO” emission factors.
Our Sustainability Context				
Governance				
Strategy	Category 2 – Capital Goods	Emissions from the extraction, production, and transportation of capital goods purchased or acquired.	This includes all spend on tangible and non-tangible assets such as land and buildings/ vehicles etc.	Spend-based method. Emissions for procurement spend were calculated using the 2018 Environmentally Extended Input-Output “EEIO” factors. Spend for assets not completed in the reporting year has been excluded (i.e., work in progress spend), as these assets would likely be developed and in place in the following reporting year and would then be included.
Risk Management				
Metrics & Targets	Category 3 – Fuel and Energy Related Activities	Emissions from the extraction, production and transportation of fuels and energy purchased and acquired, not already accounted for in Scope 1 or Scope 2.	This includes transportation and distribution emissions directly calculated from Scope 1 and 2 energy consumption.	Fuel-based method. Scope 1 and 2 actual consumptions were used to calculate the fuel and energy related activity emissions. DEFRA 2021 Advanced Users Conversion Factors were used.
Appendix				
	Category 4 – Upstream transportation and distribution	Emissions from the transportation and distribution of products purchased.	This includes emissions from transportation of goods and services by land, sea, and air freight.	Distance-based method. Emissions are calculated by determining the journey distance and journey transport modes and applying the appropriate emission factors (emissions/km travelled for mode). The actual distance and weight were multiplied with DEFRA 2021 Advanced Users Conversion Factors to calculate the emissions.

Scope 3 Category	Category Definition	Relevance to MTN	Approach, Calculation and Emission Factors
Category 5 – Waste generated in operations	Emissions from the disposal and treatment of waste generated	This includes emissions from waste generated such as general waste, recycled waste, e-waste etc.	Emissions from waste generated in operations were calculated using a bottom-up approach based on actual waste generation data collected with relevant emissions factor applied
Category 6 – Business Travel	Emissions from the transportation of employees for business-related activities (in vehicles not owned or operated by the reporting company)	This includes emissions from air travel. This is the most material source of emissions from business travel.	Spend-based method. Air travel emissions are directly calculated using spend data multiplied by corresponding emission factors. We have substantial influence over the extent, modes and class of travel undertaken for business travel and the opportunity to create internal awareness, adapt behaviour and reduce emissions in this category.
Category 7 – Employee Commuting	Emissions from the transportation of employees between their homes and worksites.	Relates to the emissions of employees in commuting to offices and worksites.	Average data method. Emissions were calculated based on the total number of employees (headcount). GHG protocol factor used to estimate emissions. We are revising our data collection processes to raise awareness internally, encourage behavioural changes in employee commuting habits and contribute to the completeness of our Scope 3 inventory.
Category 8 – Upstream Leased assets	Emissions from the operation of leased assets.	Not relevant to MTN	The company does not have upstream leased assets for which it has operational control, and this category is therefore not relevant and not calculated.
Category 9 – Downstream transportation and distribution	Emissions from the transportation and distribution of products sold.	Transportation and distribution of products sold by MTN Nigeria in the reporting year between the reporting company’s operations and the end consumer (if not paid for by the reporting company), including retail and storage (in vehicles and facilities not owned or controlled by the reporting company)	Distance-based method. Emissions were calculated using the weight and distance travelled (tonne.km) multiplied by the applicable emissions factor.

Scope 3 Category	Category Definition	Relevance to MTN	Approach, Calculation and Emission Factors
Category 10 – Processing of sold products	Emissions from the processing of intermediate products sold by downstream companies, e.g. manufacturers	This category is not applicable to MTN	This category is not applicable to MTN and therefore, not calculated.
Category 11 – Use of Sold Products	Emissions from the end use of goods and services sold.	This category has not been included.	Data for this metric is currently unavailable. We are unable to estimate emissions for this category due to the absence of available emissions factors needed to quantify emissions.
Category 12 – End-of-Life Treatment of Sold Products	Emissions from the disposal and treatment of products sold at the end of their life.	This category has not been included.	Data for this metric is currently unavailable. We are unable to estimate emissions for this category due to the absence of available emissions factors needed to quantify emissions.
Category 13 – Downstream Leased Assets	Emissions from the operation of assets owned by MTN (lessor) and leased to other entities.	Not relevant to MTN	The company does not have downstream leased assets for which it has operational control, and this category is, therefore, not relevant and not calculated.
Category 14 – Franchises	Emissions from the operation of franchises	This includes emissions from franchises' operations.	Estimation / Average based method. Involves collecting site-specific Scope 1 & 2 data directly from franchises. Extrapolation method used for 2024 data where actual data was for franchises not available. The company's owned stores data, such as energy consumption and store size, was extrapolated to ascertain franchise related emissions and determine a tCO ₂ e per store value. This rate was then applied to the number of franchised stores
Category 15 – Investments	Emissions from operation of investments and Joint ventures.	This includes emissions from operation of investments not included in Scope 1 and Scope 2	Emissions from investments were calculated based on actual data collected with relevant emissions factor applied.

	GOVERNANCE		
	IFRS S1-27(a)	The governance body(s) (which can include a board, committee or equivalent body charged with governance) or individual(s) responsible for oversight of sustainability-related risks and opportunities, including information about: i. How responsibilities for sustainability-related risks and opportunities are reflected in the terms of reference, mandates, role descriptions and other related policies applicable to that body(s) or individual(s). ii. How the body(s) or individual(s) determines whether appropriate skills and competencies are available or will be developed to oversee strategies designed to respond to sustainability-related risks and opportunities. iii. How and how often the body(s) or individual(s) is informed about sustainability-related risks and opportunities. iv. How the body(s) or individual(s) takes into account sustainability- related risks and opportunities when overseeing the entity's strategy, its decisions on major transactions and its risk management processes and related policies, including whether the body(s) or individual(s) has considered trade-offs associated with those risks and opportunities. v. How the body(s) or individual(s) oversees the setting of targets related to sustainability-related risks and opportunities, and monitors progress towards those targets, including whether and how related performance metrics are included in remuneration policies.	Our Leadership and Oversight Structure Sustainability Governance Board Skills and Experience Operational Policies and Guiding Principles
	IFRS S1-27(b)	Management's role in the governance processes, controls and procedures used to monitor, manage, and oversee sustainability-related risks and opportunities, including information about: i. Whether the role is delegated to a specific management-level position or management-level committee and how oversight is exercised over that position or committee. ii. Whether management uses controls and procedures to support the oversight of sustainability-related risks and opportunities and, if so, how these controls and procedures are integrated with other internal functions.	Management's Role in Sustainability at MTN Nigeria

	STRATEGY - Sustainability-related risks and opportunities		
Introduction	IFRS S1-30 (a)	Sustainability-related risks and opportunities that could reasonably be expected to affect the entity's prospects.	Sustainability-Related Risks and Opportunities
	IFRS S1-30 (b)	The time horizons—short, medium, or long term—over which the effects of each of those sustainability-related risks and opportunities could reasonably be expected to occur.	
Our Sustainability Context	IFRS S1-30 (c)	The definitions of 'short term', 'medium term' and 'long term' and how these definitions are linked to the planning horizons used by the entity for strategic decision-making.	Impact of Risks and Opportunities Across our Business
Governance	STRATEGY - Business model and value chain		
Strategy	IFRS S1-32(a)	A description of the current and anticipated effects of sustainability- related risks and opportunities on the entity's business model and value chain.	Sustainability-Related Risks and Opportunities
Risk Management	IFRS S1-32(b)	A description of where in the entity's business model and value chain sustainability-related risks and opportunities are concentrated (for example, geographical areas, facilities, and types of assets).	
Metrics & Targets			Our Telecom Footprint
	STRATEGY - Strategy and decision-making		
Appendix	IFRS S1-33 (a)	How the entity has responded to, and plans to respond to, sustainability-related risks and opportunities in its strategy and decision-making.	Impact of Risks and Opportunities Across our Business
	IFRS S1-33 (b)	The progress against plans the entity has disclosed in previous reporting periods, including quantitative and qualitative information.	Our Sustainability Footprint
	IFRS S1-33 (c)	Trade-offs between sustainability-related risks and opportunities that the entity considered (for example, in making a decision on the location of new operations, an entity might have considered the environmental impacts of those operations and the employment opportunities they would create in a community).	Business Model, Strategy, Decision Making and Value Chain

IFRS S1 Content Index (contd.)

STRATEGY - Financial Position, Financial Performance and Cash Flow		
Introduction	IFRS S1-34 (a) The effects of sustainability-related risks and opportunities on the entity's financial position, financial performance, and cash flows for the reporting period (current financial effects).	Financial Position, Performance and Cashflow
Our Sustainability Context	IFRS S1-34 (b) The anticipated effects of sustainability-related risks and opportunities on the entity's financial position, financial performance, and cash flows over the short, medium, and long term, taking into consideration how sustainability-related risks and opportunities are included in the entity's financial planning (anticipated financial effects).	
Governance	IFRS S1-35 (a) Quantitative and qualitative information about how sustainability-related risks and opportunities have affected its financial position, financial performance, and cash flows for the reporting period.	
Strategy	IFRS S1-35 (b) Quantitative and qualitative information about the sustainability-related risks and opportunities identified in paragraph 35(a) for which there is a significant risk of a material adjustment within the next annual reporting period to the carrying amounts of assets and liabilities reported in the related financial statements.	
Risk Management	IFRS S1-35(c) Quantitative and qualitative information about how the entity expects its financial position to change over the short, medium, and long term, given its strategy to manage sustainability-related risks and opportunities, taking into consideration: I. Its investment and disposal plans (for example, plans for capital expenditure, major acquisitions and divestments, joint ventures, business transformation, innovation, new business areas, and asset retirements), including plans the entity is not contractually committed to. ii. Its planned sources of funding to implement its strategy.	
Metrics & Targets		
Appendix	IFRS S1-35 (d) Quantitative and qualitative information about how the entity expects its financial performance and cash flows to change over the short, medium, and long term, given its strategy to manage sustainability-related risks and opportunities.	Sustainability-related Risks and Opportunities
STRATEGY - Resilience		
	IFRS S1-41 A qualitative and, if applicable, quantitative assessment of the resilience of its strategy and business model in relation to its sustainability-related risks, including information about how the assessment was carried out and its time horizon.	Climate Resilience

IFRS S1 Content Index (contd.)

Reference	Disclosure Description	Section
RISK MANAGEMENT		
IFRS S1-44(a)	The processes and related policies the entity uses to identify, assess, prioritise, and monitor sustainability-related risks, including information about: i. The inputs and parameters the entity uses (for example, information about data sources and the scope of operations covered in the processes). ii. Whether and how the entity uses scenario analysis to inform its identification of sustainability-related risks. iii. How the entity assesses the nature, likelihood, and magnitude of the effects of those risks (for example, whether the entity considers qualitative factors, quantitative thresholds or other criteria). iv. Whether and how the entity prioritises sustainability-related risks relative to other types of risk. v. How the entity monitors sustainability-related risks. vi. Whether and how the entity has changed the processes it uses compared with the previous reporting period.	Risk Management at MTN Nigeria Identification, Assessment and Management of SRROs and CRROs
IFRS S1-44(b)	The processes the entity uses to identify, assess, prioritise, and monitor sustainability-related opportunities.	
IFRS S1-44(c)	The extent to which, and how, the processes for identifying, assessing, prioritising, and monitoring sustainability-related risks and opportunities are integrated into and inform the entity's overall risk management process.	
METRICS AND TARGETS		
IFRS S1-46(a)	Metrics required by an applicable IFRS Sustainability Disclosure Standard for each sustainability-related risk and opportunity that could reasonably be expected to affect the entity's prospects.	Moving Forward: Metrics and Targets Sustainability Progress Tracker (Year-on-Year Performance Trend)
IFRS S1-46(b)	Metrics the entity uses to measure and monitor that sustainability-related risk or opportunity and its performance in relation to that sustainability-related risk or opportunity, including progress towards any targets the entity has set and any targets it is required to meet by law or regulation.	
IFRS S1-51(a)	The metric used to set the target and to monitor progress towards reaching the target.	
IFRS S1-51(b)	The specific quantitative or qualitative target the entity has set or is required to meet.	
IFRS S1-51(c)	The period over which the target applies.	
IFRS S1-51(d)	The base period from which progress is measured.	
IFRS S1-51(e)	Any milestones and interim targets.	
IFRS S1-51(f)	Performance against each target and an analysis of trends or changes in the entity's performance.	
IFRS S1-51(g)	Any revisions to the target and an explanation for those revisions.

STRATEGY - Strategy and Decision-making		
IFRS S2-14(a)	How the entity has responded to, and plans to respond to, climate-related risks and opportunities in its strategy and decision-making, including how the entity plans to achieve any climate-related targets it has set and any targets it is required to meet by law or regulation, including the information about: I. Current and anticipated changes to the entity’s business model, including its resource allocation, to address climate- related risks and opportunities (for example, these changes could include plans to manage or decommission carbon-, energy- or water-intensive operations; resource allocations resulting from demand or supply-chain changes; resource allocations arising from business development through capital expenditure or additional expenditure on research and development; and acquisitions or divestments). ii. Current and anticipated direct mitigation and adaptation efforts (for example, through changes in production processes or equipment, relocation of facilities, workforce adjustments, and changes in product specifications). iii. Current and anticipated indirect mitigation and adaptation efforts (for example, through working with customers and supply chains). iv. Any climate-related transition plans the entity has, including information about key assumptions used in developing its transition plan, and dependencies on which the entity’s transition plan relies. v. How the entity plans to achieve any climate-related targets, including any greenhouse gas emissions targets.	Our Sustainability Footprint Climate-related Risks and Opportunities Doing for Planet (Environmental Pillar)
IFRS S2-14(b)	How the entity is resourcing, and plans to resource, the activities disclosed in accordance with 14(a).	Doing for Planet (Environmental Pillar) Sustainability Progress Tracker (Year-on-Year Performance Trend)
IFRS S2-14(c)	Quantitative and qualitative information about the progress of plans disclosed in previous reporting periods in accordance with paragraph 14(a).	
STRATEGY - Financial position, financial performance, and cash flows		
IFRS S2-15(a)	The effects of climate-related risks and opportunities on the entity’s financial position, financial performance, and cash flows for the reporting period (current financial effects)	Financial Position, Performance and Cash Flow
IFRS S2-15(b)	The anticipated effects of climate-related risks and opportunities on the entity’s financial position, financial performance and cash flows over the short, medium and long term, taking into consideration how climate-related risks and opportunities are included in the entity’s financial planning (anticipated financial effects).	

IFRS S2 Content Index (contd.)

Reference	Disclosure Description	Section
IFRS S2-16(a)	How climate-related risks and opportunities have affected its financial position, financial performance, and cash flows for the reporting period.	
IFRS S2-16(b)	The climate-related risks and opportunities identified in paragraph 16(a) for which there is a significant risk of a material adjustment within the next annual reporting period to the carrying amounts of assets and liabilities reported in the related financial statements.	
IFRS S2-16(c)	How the entity expects its financial position to change over the short, medium, and long term, given its strategy to manage climate-related risks and opportunities, taking into consideration: I. Its investment and disposal plans (for example, plans for capital expenditure, major acquisitions and divestments, joint ventures, business transformation, innovation, new business areas, and asset retirements), including plans the entity is not contractually committed to. ii. Its planned sources of funding to implement its strategy	
IFRS S2-16(d)	How the entity expects its financial performance and cash flows to change over the short, medium, and long term, given its strategy to manage climate-related risks and opportunities (for example, increased revenue from products and services aligned with a lower-carbon economy; costs arising from physical damage to assets from climate events; and expenses associated with climate adaptation or mitigation).	
STRATEGY - Climate Resilience		
IFRS S2-22(a)	The entity's assessment of its climate resilience as of the reporting date, including the information about: I. The implications, if any, of the entity's assessment for its strategy and business model, including how the entity would need to respond to the effects identified in the climate-related scenario analysis. ii. The significant areas of uncertainty considered in the entity's assessment of its climate resilience. iii. The entity's capacity to adjust or adapt its strategy and business model to climate change over the short, medium, and long term, including: (1) The availability of, and flexibility in, the entity's existing financial resources to respond to the effects identified in the climate-related scenario analysis, including to address climate-related risks and to take advantage of climate-related opportunities. (2) The entity's ability to redeploy, repurpose, upgrade, or decommission existing assets. (3) The effect of the entity's current and planned investments in climate-related mitigation, adaptation, and opportunities for climate resilience. Climate Resilience Impact of Risks and Opportunities Across our Business	

IFRS S2 Content Index (contd.)

Reference	Disclosure Description	Section
IFRS S2-22(b)	How and when the climate-related scenario analysis was carried out, including the information about: i. The inputs the entity used, including: (1) Which climate-related scenarios the entity used for the analysis and the sources of those scenarios. (2) Whether the analysis included a diverse range of climate-related scenarios. (3) Whether the climate-related scenarios used for the analysis are associated with climate-related transition risks or climate-related physical risks. (4) Whether the entity used, among its scenarios, a climate-related scenario aligned with the latest international agreement on climate change. (5) Why the entity decided that its chosen climate-related scenarios are relevant to assessing its resilience to climate-related changes, developments, or uncertainties. (6) The time horizons the entity used in the analysis. (7) What scope of operations the entity used in the analysis (for example, the operating locations and business units used in the analysis). ii. The key assumptions the entity made in the analysis, including assumptions about: (1) Climate-related policies in the jurisdictions in which the entity operates. (2) Macroeconomic trends. (3) National- or regional-level variables (for example, local weather patterns, demographics, land use, infrastructure, and availability of natural resources). (4) Energy usage and mix. (5) Developments in technology. The reporting period in which the climate-related scenario analysis was carried out.	Climate Resilience
RISK MANAGEMENT		
IFRS S2-25(a)	The processes and related policies the entity uses to identify, assess, prioritise, and monitor climate-related risks, including information about: i. The inputs and parameters the entity uses (for example, information about data sources and the scope of operations covered in the processes). ii. Whether and how the entity uses climate-related scenario analysis to inform its identification of climate-related risks. iii. How the entity assesses the nature, likelihood, and magnitude of the effects of those risks (for example, whether the entity	Risk Management

Introduction	considers qualitative factors, quantitative thresholds, or other criteria). iv. Whether and how the entity prioritises climate-related risks relative to other types of risk. v. How the entity monitors climate-related risks. vi. Whether and how the entity has changed the processes it uses compared with the previous reporting period.	
Our Sustainability Context	IFRS S2-25(b) The processes the entity uses to identify, assess, prioritise, and monitor climate-related opportunities, including information about whether and how the entity uses climate-related scenario analysis to inform its identification of climate-related opportunities.	
Governance	IFRS S2-25(c) The extent to which, and how, the processes for identifying, assessing, prioritising, and monitoring climate-related risks and opportunities are integrated into and inform the entity's overall risk management process.	
Strategy		

METRICS AND TARGETS - Climate-related Metrics

Risk Management	IFRS S2-29(a) Information relevant to the cross-industry metric categories of greenhouse gases, including: i. Absolute gross greenhouse gas emissions generated during the reporting period, expressed as metric tonnes of CO2 equivalent, classified as: (1) Scope 1 greenhouse gas emissions. (2) Scope 2 greenhouse gas emissions. (3) Scope 3 greenhouse gas emissions. ii. Measure its greenhouse gas emissions in accordance with the Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (2004) unless required by a jurisdictional authority or an exchange on which the entity is listed to use a different method for measuring its greenhouse gas emissions. iii. The approach used to measure greenhouse gas emissions including: (1) The measurement approach, inputs, and assumptions the entity uses to measure its greenhouse gas emissions. (2) The reason why the entity has chosen the measurement approach, inputs, and assumptions it uses to measure its greenhouse gas emissions. (3) Any changes the entity made to the measurement approach, inputs and assumptions during the reporting period and the reasons for those changes. iv. For Scope 1 and Scope 2 greenhouse gas emissions disclosed in accordance with paragraph 29(a)(i) (1)–(2),	Metrics and Targets

Introduction	disaggregate emissions between: (1) The consolidated accounting groups. (2) Other investees excluded from paragraph 29(a)(iv)(1) (for example, for an entity applying IFRS Accounting Standards, these investees would include associates, joint ventures, and unconsolidated subsidiaries).	
Our Sustainability Context	v. Location-based Scope 2 greenhouse gas emissions, and the information about any contractual instruments that is necessary to inform users' understanding of the entity's Scope 2 greenhouse gas emissions.	
Governance	vi. For Scope 3 greenhouse gas emissions disclosed in accordance with paragraph 29(a)(i)(3), and with reference to paragraphs B32–B57: (1) The categories included within the entity's measure of Scope 3 greenhouse gas emissions, in accordance with the Scope 3 categories described in the Greenhouse Gas Protocol Corporate Value Chain (Scope 3) Accounting and Reporting Standard (2011).	
Strategy	(2) Additional information about the entity's Category 15 greenhouse gas emissions or those associated with its investments (financed emissions), if the entity's	
Risk Management	vii. Activities include asset management, commercial banking, or insurance.	
Metrics & Targets	IFRS S2-29(b)	Climate-related transition risks—the amount and percentage of assets or business activities vulnerable to climate-related transition risks.
	IFRS S2-29(c)	Climate-related physical risks—the amount and percentage of assets or business activities vulnerable to climate-related physical risks.
	IFRS S2-29(d)	Climate-related opportunities—the amount and percentage of assets or business activities aligned with climate- related opportunities.
	IFRS S2-29(e)	Capital deployment—the amount of capital expenditure, financing or investment deployed towards climate-related risks and opportunities.
	IFRS S2-29(f)	Internal carbon prices, including the information about: i. An explanation of whether and how the entity is applying a carbon price in decision-making (for example, investment decisions, transfer pricing and scenario analysis). ii. The price for each metric tonne of greenhouse gas emissions the entity uses to assess the costs of its greenhouse gas emissions.
Appendix	IFRS S2-29(g)	Remuneration, including the information about: i. A description of whether and how climate-related considerations are factored into executive remuneration (see also paragraph 6(a)(v)). ii. The percentage of executive management remuneration recognised in the current period that is linked to climate-related considerations.

IFRS S2 Content Index (contd.)

Reference	Disclosure Description	Section
METRICS AND TARGETS - <i>Climate-related targets</i>		
IFRS S2-33(a)	The metric used to set the target.	Metrics and Targets
IFRS S2-33(b)	The objective of the target (for example, mitigation, adaptation, or conformance with science-based initiatives).	
IFRS S2-33(c)	The part of the entity to which the target applies (for example, whether the target applies to the entity in its entirety or only a part of the entity, such as a specific business unit or specific geographical region).	Doing for Planet (Environmental Pillar).
IFRS S2-33(d)	The period over which the target applies.	Our Roadmap to Net Zero Emissions
IFRS S2-33(e)	The base period from which progress is measured.	GHG Accounting Methodology
IFRS S2-33(f)	Any milestones and interim targets.	
IFRS S2-33(g)	If the target is quantitative, whether it is an absolute target or an intensity target.	Approaches for Managing Climate-Related Risks and Opportunities,
IFRS S2-33(h)	How the latest international agreement on climate change, including jurisdictional commitments that arise from that agreement, has informed the target.	
IFRS S2-34(a)	Whether the target and the methodology for setting the target has been validated by a third party.	
IFRS S2-34(b)	The entity's processes for reviewing the target.	
IFRS S2-34©	The metrics used to monitor progress towards reaching the target.	
IFRS S2-34(d)	Any revisions to the target and an explanation for those revisions.	
IFRS S2-35	An entity shall disclose information about its performance against each climate-related target and an analysis of trends or changes in the entity's performance.	
IFRS S2-36(a)	Which greenhouse gases are covered by the target.	
IFRS S2-36(b)	Whether Scope 1, Scope 2 or Scope 3 greenhouse gas emissions are covered by the target.	
IFRS S2-36(c)	Whether the target is a gross greenhouse gas emissions target or net greenhouse gas emissions target. If the entity discloses a net greenhouse gas emissions target, the entity is also required to separately disclose its associated gross greenhouse gas emissions target.	
IFRS S2-36(d)	Whether the target was derived using a sectoral decarbonisation approach.	
IFRS S2-36(e)	The entity's planned use of carbon credits to offset greenhouse gas emissions to achieve any net greenhouse gas emissions target, including the information about: i. The extent to which, and how, achieving any net greenhouse gas emissions target relies on the use of carbon credits. ii. Which third-party scheme(s) will verify or certify the carbon credits. iii. The type of carbon credit, including whether the underlying offset will be nature-based or based on technological carbon removals, and whether the underlying offset is achieved through carbon reduction or removal. iv. Any other factors necessary for users of general-purpose financial reports to understand the credibility and integrity of the carbon credits the entity plans to use (for example, assumptions regarding the permanence of the carbon offset).

	TC-TL-550a.2	Discussion of systems to provide unimpeded service during service disruptions	We use geo-redundancy across various sites and levels to consistently meet and surpass our performance and availability targets as outlined in our SLAs. We maintain comprehensive monitoring of all critical systems to detect and resolve issues proactively, preventing them from escalating into bigger problems. Additionally, we employ automation for self-healing incidents to enhance service quality. Our 24/7 support and monitoring team is always ready to promptly address any faults using advanced monitoring tools. These strategies collectively reduce the risk of operational disruptions and ensure continuous service delivery.

	Environmental Footprint Of Hardware Infrastructure		
Introduction	TC-SI-130a.1	1) Total Energy consumed	1,004,650.5 gigajoules (GJ)
	TC-SI-130a.1	2) Percentage Grid Electricity	17.3%.
Our Sustainability Context	TC-SI-130a.1	3) Percentage renewable	0.06%.
Governance	TC-SI-130a.2	(1) Total water withdrawn	In 2024, the total quantity of water withdrawn amounted to 4,669.0 megalitres, sourced primarily from groundwater (4,661.5 megalitres) and municipal water supply (7.52 megalitres). No withdrawals were recorded from surface water, rainwater, or produced water.
Strategy	TC-SI-130a.2	(2) Total water consumed; percentage of each in regions with High or Extremely High Baseline Water Stress	The total quantity of water consumed by MTN in 2024 was 4701.0 megalitres, comprising 31.92 megalitres from potable water (drinking water, dispensers, bottled water), 4661.5 megalitres from groundwater, and 7.52 megalitres from municipal water (government-provided). There was 0% consumption in regions classified as having High or Extremely High Baseline Water Stress
Risk Management			
Metrics & Targets	TC-SI-130a.3	Discussion of the integration of environmental considerations into strategic planning for data centre needs	We achieve integration of environmental considerations into strategic planning for data centres through Project Needs Evaluation, Impact Analysis, and Sustainability Assessments. Also, this is done by implementing energy-efficient and low-carbon emission solutions. Additionally, MTN Nigeria prioritise sustainable water usage within data centres to minimise environmental impact. When selecting sites for data centres, MTN Nigeria evaluates climatic conditions, topography, flood risks, security, accessibility, and environmental pollution to ensure sustainability. Measures such as securing a reliable public water supply, leveraging alternative power sources like gas and solar, and optimising cooling and energy consumption further contribute to environmental sustainability in data centre operations.
Appendix	Data Privacy & Freedom Of Expression		
	TC-SI-220a.1	Description of policies and practices relating to behavioural advertising and user privacy.	MTN Nigeria's policies and practices relating to behavioural advertising and user privacy are governed by the MTN Nigeria Data Privacy and Protection Policy. This policy outlines the principles for data collection,

SASB Software and IT Services Index (contd.)

Code	Metric	Responses
Introduction	Description of policies and practices relating to behavioural advertising and user privacy (contd).	requiring the consent of data subjects and ensuring that their rights are protected. Furthermore, MTN Nigeria adheres to relevant data protection laws, ensuring that any processing of customers' personal data, including for secondary purposes, is conducted in compliance with these regulations.
Our Sustainability Context	TC-SI-220a.2 Number of users whose information is used for secondary purposes.	Zero. Customers' personal data may be processed for secondary purposes. However, this is done in compliance with the relevant data protection laws.
Governance	TC-SI-220a.3 Total amount of monetary losses as a result of legal proceedings associated with user privacy	None. We did not have any financial losses due to legal issues related to customer privacy.
Strategy	TC-SI-220a.4 1) Number of law enforcement requests for user information,	We received a total of 43,034 unique requests for customer information from government or law enforcement agencies.
Risk Management	TC-SI-220a.4 2) Number of users whose information was requested	We disclosed customer information in response to 42,602 requests from law enforcement agencies.
Metrics & Targets	TC-SI-220a.4 3) percentage resulting in disclosure	The percentage resulting in disclosure was 98.9%, this was calculated by number of unique requests (42,602) divided by the total number of unique requests (43,034) received.
Appendix	TC-SI-220a.5 List of countries where core products or services are subject to government-required monitoring, blocking, content filtering, or censoring	MTN Nigeria's core products and services are subject to government-required monitoring, blocking, and content filtering under the Nigerian Communications Act, with law enforcement agencies authorised to intercept communications via warrant. Mobile Network Operators (MNOs) in Nigeria are required by law to maintain intercept-capable networks, as outlined in Section 147 of the Nigerian Communications Act. Law enforcement agencies such as the Office of the National Security Adviser, Department of State Services, and the Nigerian Police Force can intercept communications upon obtaining a warrant, as stated in Regulations 4 & 10(1) of the Lawful Interception of Communications Regulations, 2019. Additionally, MNOs are required to implement Anti-Spam software to block unsolicited messages traversing their networks, as per directives from the Nigerian Communications Commission (NCC).

Code	Metric	Responses
Data Security		
TC-SI-230a.1	(1) Number of data breaches,	Zero.
TC-SI-230a.1	(2) percentage involving personally identifiable information (PII)	Zero.
TC-SI-230a.1	(3) number of users affected	Zero.
TC-SI-230a.2	Description of approach to identifying and addressing data security risks, including the use of third-party cybersecurity standards	MTN Nigeria identifies and addresses data security risks through a structured Information Security Risk Management Methodology. This methodology encompasses proactive identification and classification of information assets, prioritisation of risks, and implementation of risk control strategies. Key measures include automated periodic vulnerability scanning, independent security assessments, penetration testing, participation in bug bounty programmes, and dynamic threat intelligence integration. Additionally, we adhere to internationally recognised cybersecurity standards such as NIST, ISO 27001:2022, and PCI DSS, ensuring compliance through an operationalised Information Security Management System (ISMS) and periodic third-party audits.
Recruiting & Managing A Global, Diverse & Skilled Workforce		
TC-SI-330a.1	1) Percentage of employees that are foreign nationals	The percentage of employees who are foreign nationals is 0.27%, which translates to five foreign nationals.
TC-SI-330a.1	2) Percentage of employees that are located offshore	None. We do not have any employees located offshore.
TC-SI-330a.2	Employee engagement as a percentage	The employee engagement score for 2024, as assessed through the GCA Sustainable Engagement Score, stands at 92%, marking an improvement of +5 percentage points compared to the 2023 outcome
TC-SI-330a.3	1) Percentage of gender and racial/ethnic group representation for management	The gender representation within our management team (Level 3 and above) is 68.3% male (343 individuals) and 34.7% female (182 individuals). The racial/ethnic group representation is 1.0% foreign national (5 employees) and 99.0% Nigerian (520 employees).

SASB Software and IT Services Index (contd.)

CodeMetricResponses		
IntroductionOur Sustainability Context	TC-SI-330a.32) Percentage of gender and racial/ethnic group representation for technical staff	The gender representation within our technical staff is 77.9% male (352 individuals in IT & Network) and 22.1% female (100 individuals in IT & Network). The racial/ethnic group representation is 0.4% foreign national (2 employees) and 99.6% Nigerian employees (450 employees).
	TC-SI-330a.33) Percentage of gender and racial/ethnic group representation for all other employees	The gender representation among all other employees is 52.3% male (729 employees) and 47.7% female (666 employees). The racial/ethnic group representation is 0.2% foreign national (3 employees) and 99.8% Nigerian employees (1,392 employees).
Governance	Intellectual Property Protection & Competitive Behaviour	
Strategy	TC-SI-520a.1Total amount of monetary losses as a result of legal proceedings associated with anti-competitive behaviour regulations	Zero
Risk Management	Managing Systemic Risks From Technology Disruptions	
Metrics & TargetsAppendix	TC-SI-550a.11) Number of performance issues	Zero. There was no material performance issues (such as technical failures, programming errors, cyber-attacks, weather events or natural disasters at hosting facilities) due to any planned or unplanned downtime causing an interruption in the provision of cloud-based services to customers.
	TC-SI-550a.12) Number of service disruptions	A total of 65 service disruptions, which includes all severity 1 and severity 2 incidents reported by the IT and Network teams
	TC-SI-550a.13) Total customer downtime	Zero. There was no material customer downtime related to performance issues and service disruptions (such as technical failures, programming errors, cyber-attacks, weather events or natural disasters at hosting facilities) due to any planned or unplanned downtime causing an interruption in the provision of cloud-based services to customers.
	TC-SI-550a.2Description of business continuity risks related to disruptions of operations	The primary business continuity risks related to operational disruptions in 2024 include the single point of failure at the Ojota switch, insecurity affecting network operations and workforce safety, damage to MTN's backbone, metro, and last-mile fibre cables, third-party risks associated with external service providers, and increasing cyber threats targeting MTN Nigeria infrastructure.

Glossary

Introduction	Carbon Footprint	The amount of carbon dioxide and other carbon compounds emitted as a result of human activities, typically measured in tonnes.
	Circular Economy	An economic system aimed at eliminating waste and the continual use of resources through reuse, repair, refurbishment, and recycling.
	Circular Supply Chain	A supply chain designed to maximise the reuse of materials and minimise waste through recycling, repurposing, or upcycling.
Our Sustainability Context	Community Investment	Investments made by a company to support and enhance the welfare and development of the communities in which it operates.
Governance	Corporate Governance	The systems, principles, and processes by which a company is directed and controlled, ensuring transparency and accountability.
	Corporate Social Investment	Activities and investments aimed at promoting the welfare of communities and addressing social issues.
Strategy	Data Privacy	The protection of personal data and ensuring that it is collected, stored, and shared with consent and compliance
